

BCNET

Annual Review
2024/2025

ABOUT BCNET

Since its formation in 1988, BCNET has proudly served as a cornerstone of collaboration, innovation, and technological advancement in British Columbia’s higher education and research community. BCNET has helped shape the province’s digital future, playing a pivotal role in launching B.C.’s first internet infrastructure and the first video conferencing and shared IT service for post-secondary education.

BCNET is a not-for-profit, member-led organization that delivers services to meet the evolving needs of our members. Our community includes post-secondary institutions and research organizations across the province. It offers a wide range of solutions in networking, information technology, educational technology, cybersecurity, and procurement.

BCNET is located on the unceded traditional territories of the Coast Salish peoples, including the xʷməθkwəy̓əm (Musqueam), Skwxwú7mesh (Squamish), and səlilwətaɬ (Tsleil-Waututh) First Nations.

EFFICIENCIES

Our collaborative approach to sourcing technology and other essential services and contracts helps reduce costs, minimize duplication, and streamline efficiencies.

SERVICE EXCELLENCE

We are committed to delivering service excellence that is responsive, reliable, and available to our members.

A CATALOGUE OF SERVICES

We offer an extensive catalogue of over 130 cost-effective technology products and services, and general/IT contracts.

COMMITMENT TO EQUITY, DIVERSITY, AND INCLUSION

BCNET fosters a culture of inclusion, where everyone is welcomed and valued. We embrace equity, diversity, and inclusion as a source of our strength, allowing everyone to contribute and thrive.

MESSAGE FROM THE CHAIR

As Chair of the Board, I'm pleased to reflect on a remarkable year of growth and achievement for BCNET. Our organization has always been driven by three core values—Collaboration, Innovation, and Responsiveness—and this year, these values were more important than ever.

“BCNET remains a trusted partner for our members. Our ability to adapt and lead in this dynamic environment is a direct result of our collaborative approach. It is this member-led model that ensures our services remain relevant and responsive to the needs of the sector.”

The post-secondary sector continues to navigate a rapidly evolving landscape. Whether we are enhancing the network and cybersecurity measures or leveraging our robust procurement and shared technology services, BCNET remains a trusted partner for our members. Our ability to adapt and lead in this dynamic environment is a direct result of our collaborative approach. It is this member-led model that ensures our services remain relevant and responsive to the needs of the sector.

Our network continued to grow, providing secure, high-speed connectivity that is vital to research, learning, and communication across British Columbia. I am proud to say that BCNET’s strategic investments in network redundancy have safeguarded our members against potential disruptions, even at critical moments, such as the wildfire season or during increased cybersecurity threats. These measures are a testament to our forward-thinking mindset and our commitment to keeping our members connected, no matter the circumstances.

I have spent over 30 years in higher education, with the better part of 10 of those years spent around the BCNET board table, and I can confidently say that BCNET is more than just a network provider—it is a community. It is a place where members come together, share insights, solve problems, and ultimately transform the sector for the better. I feel privileged to serve this organization.

I want to express my deepest gratitude to my fellow Board members for their dedication and leadership, and to the BCNET team for their tireless efforts in delivering exceptional value. Your hard work and commitment are the foundation of our success.

To our members, thank you for your trust, your engagement, and your continued support. Together, we are building something far greater than any of us could achieve alone.

I look forward to another year of shared success and continued innovation.

Matt Milovick, Chair

MESSAGE FROM THE PRESIDENT

As we reflect on the past year, I am filled with immense pride and gratitude for the remarkable journey that we as a community have shared. At BCNET, we passionately and purposefully harness the collaborative potential of our community to achieve world-class education, and 2024-2025 has been a testament to that.

In the face of evolving challenges and opportunities, our network has continued to grow significantly. Over the past year, we facilitated the transfer of 217,558,950 gigabytes of data, marking an impressive 12% year-over-year increase in network traffic. Thanks to our forward-thinking approach and funding from the Ministry of Post-Secondary Education and Future Skills, we were able to implement 400 Gbps upgrades at our Vancouver, Victoria, and Surrey exchanges. This enhancement not only bolsters our network’s backbone capacity but also positions our members to take full advantage of cutting-edge connectivity, with SFU leading the way as the first of our institutions to benefit from it.

Our commitment to innovation was further exemplified by the successful evolution of our Firewall-as-a-Service (FWaaS) offering,

which now includes a “Dedicated FWaaS” option, allowing for managed and co-managed options for members. Working closely with North Island College, Okanagan College, Justice Institute of British Columbia, and Vancouver Community College, we have been fine-tuning this critical service, ensuring a secure, adaptable solution that meets the diverse needs of our members in the days to come.

In Shared Technology Services, we expanded our support for digital learning strategies by introducing the Curriculum and Catalog Management System, along with a robust Query Tool. These tools empower our members to enhance educational experiences and streamline operations, demonstrating our commitment to supporting digital excellence.

On the procurement services front, we have successfully completed the first year of our Sustainable Procurement Strategy, which underscores our commitment to environmentally and socially responsible practices. Our new partnership with Vancouver Island University to provide

Procurement Professional Service Support further amplifies our collective impact.

We also took meaningful steps to broaden member representation through our service committees, ensuring that diverse perspectives guide our decision-making and service development.

None of these achievements would be possible without the unwavering support of our members, the invaluable guidance of our Board of Directors, and the tireless dedication of our BCNET team.

As we look ahead, I want to express my deepest appreciation to each of you. Your continued support is the foundation of our success, and it is a privilege to serve and support you. At BCNET, we firmly believe that when we collaborate, we don’t just succeed—we transform.

Thank you.

Bala Kathiresan,
President & CEO

“None of these achievements would be possible without the unwavering support of our members, the invaluable guidance of our Board of Directors, and the tireless dedication of our BCNET team.”

THE YEAR IN REVIEW

HIGHLIGHTS

In 2025, we continued to foster and facilitate opportunities for collaboration among institutions to help shape current and future technology and procurement services for B.C.’s public, post-secondary and research sector.

WHO WE ARE

INSTITUTIONAL VIDEO

COLLABORATION

A CORNERSTONE OF OUR SUCCESS

By fostering and nurturing collaboration, BCNET has cultivated a unique and trusted member community. We encourage member engagement through service-focused committees, working groups, communities of practice, member forums, and events. These groups provide opportunities to learn from one another, share insights, and discover services and solutions to common challenges.

THE YEAR IN REVIEW

MEASURING OUR SUCCESS

2024/25	\$182M (+20%)
2023/24	\$151M (+13%)
2022/23	\$134M (+30%)

GROWTH IN SECTORAL SPEND IN BCNET SERVICES

20%

INCREASE IN SPEND

Our members are realizing the rewards of collaborative services, efficient processes, and outstanding service value.

\$182M

COLLABORATION SPEND

In 2024/25, we collaborated with stakeholders to expand our service portfolio and increase service adoption.

NETWORK SERVICES

NETWORK SERVICES

STRATEGIC PRIORITY

BCNET continues to invest in and upgrade the digital infrastructure to ensure members have access to our ultra-high-speed network, ensuring it remains resilient and secure.

WHAT MEMBERS SAY

From June 12 to July 4, 78 Network Services Members participated in a survey to share about their experiences with the BCNET Advanced Network. 94% rated it as excellent to good.

INFRASTRUCTURE FOR GROWTH

BCNET continues to invest in scalable, high-capacity infrastructure to support the evolving needs of our members. In preparation for increasing bandwidth demands, BCNET’s backbone network is now fully equipped to support 400Gbps connectivity. This ensures members will have access to next-generation speeds as their requirements grow.

CACHING UPGRADE COMPLETE

Our caching infrastructure has been upgraded and is now provisioned for all members. This enhancement reduces bandwidth consumption and accelerates access to frequently requested content, delivering a more efficient and responsive experience.

FIREWALL AS A SERVICE

Following a pilot phase with four members, BCNET’s Firewall-as-a-Service is now available to all members. This dedicated solution can be managed or co-managed, and is an on-prem infrastructure that delivers network security, firewall policy development, and threat protection for member networks, systems, and/or applications.

DEFENDING AGAINST CYBER THREATS

BCNET has completed a successful trial of DDoS with two member institutions. Based on positive results, the service will be rolled out more broadly across the membership in the coming fiscal year, offering enhanced protection against evolving cyber threats through automated detection and response.

BCNET Honoured at CAUBO 2024 Q&P Awards for Pioneering Collaborative Electronic Research Administration Project

BCNET and esteemed partners—the Ontario Education Collaborative Marketplace (OECM), Cybera, and InterUniversity Services (ISI)—received an honourable mention at the CAUBO 2024 Quality and Productivity (Q&P) awards. This flagship conference brings together Canadian university administrators from various functional areas to discuss higher education administration trends and best practices.

At the conference in June 2024, BCNET was honoured for our collaborative approach to improving research administration systems in Canadian campuses through the groundbreaking eRAS (electronic Research Administration System) project. The process and approach not only enhances efficiency and inclusivity but also fosters innovation.

It all began with a request from the Alliance of Canadian Comprehensive Research Universities (ACCRU) to BCNET gauge the market to replace a widely used research administration system via a Request for Information (RFI). As a result of the RFI and the need by other Canadian institutions to find a solution, BCNET reached out to Cybera, OECM, and ISI.

This eRAS project offers a robust framework for institutions and provides financial and operational benefits. It is a solution that enhances efficiency, inclusivity, and innovation and sets a new benchmark for quality and productivity in research management. Additionally, this project has allowed for significant contributions to the ongoing dialogue on best practices in research administration.

The eRAS project exemplifies the power of national collaboration, enhancing research administration with innovation, inclusivity, and efficiency. This honourable mention at CAUBO 2024 is a testament to what we can achieve together

We are thankful to all our partners and the many participating institutions for their dedication and teamwork. The recognition at the CAUBO 2024 Q&P awards underscores the importance of unity and collaboration in driving forward innovation and excellence in research administration across Canada.

Milestones and Highlights

Launch of the Software Licensing Consulting Agreement

We introduced a new Software Licensing Consulting Agreement in partnership with the Software Consulting Group. This agreement offers expert support to members navigating complex software licensing landscapes—helping them optimize agreements, ensure compliance, and align investments with strategic priorities and savings.

Strategic Procurement Consulting at Vancouver Island University (VIU)

Our engagement with Vancouver Island University represents a dynamic model of member support. By providing hands on procurement support, consulting, training, and mentorship, we are helping VIU strengthen procurement strategies and build internal capacity. This tailored support showcases the tangible benefits of collaborative procurement and highlights the potential for replicable success across the sector.

Quantum’s Circular21 Award

BCNET received Quantum’s Circular21 Award for top greenhouse gas emissions savings through their e-waste program.

This award celebrates the collective efforts of BCNET and our participating members in reducing emissions by reusing and recycling old technology. Together, we’re creating a greener future!

“I am truly inspired by the collaborative spirit of our members this past year. Even amid financial pressures and enrolment challenges across BC’s higher education sector, we have continued to see participating spend grow, deliver value, and support each other. This reminds me of what we can achieve together – and I look forward to building on this momentum.”

Dennis Silva
Chief Procurement Officer

PROCUREMENT SERVICES

SUSTAINABLE PROCUREMENT

Driving Sustainability Through Collaborative Procurement Across BC’s Post-Secondary Sector

Procurement plays a critical role in advancing environmental, social, ethical, and Indigenous impact within the Post-Secondary Sector. Recognizing this, BCNET launched its three-year Sustainable Procurement Strategy in September 2023 to provide a clear collaborative roadmap for integrating sustainability into procurement decisions across BC’s post-secondary institutions.

Grounded in BCNET’s Four-Pillar Model, the strategy seeks to embed sustainable practices into shared procurement while ensuring alignment with member objectives.

Key Accomplishments in The First Year Include:

- Establishing a cross-institutional Sustainable Procurement Committee to guide and inform implementation;
- Implemented the Supplier Code of Conduct to set clear expectations for ethical and sustainable business practices;
- Developing a Sustainable Procurement Toolkit to support members in operationalizing sustainability within their procurement processes;
- Integrated ESG criteria into five high-impact procurement opportunities, emphasizing energy-efficient technologies and ethically sourced, durable solutions that align with Canada’s S-211 legislation.

Looking Ahead, BCNET Will Continue To:

- Collaborate with sector partners and leaders;
- Maintain strong engagement with suppliers to encourage and track sustainable practices;
- Building reporting models and metrics.

With over \$160 million in collective spend flowing through BCNET’s agreements annually, this strategy represents a significant opportunity to leverage our shared influence to drive meaningful, measurable sustainability outcomes for BC’s post-secondary sector.

CYBERSECURITY SERVICES

CYBERSECURITY SERVICES

HOW WE MEASURE OUR SUCCESS

BCNET’s Cybersecurity Services continues to evolve and respond to the ever-changing threat landscape. Through strong partnerships, targeted investments, and a deep commitment to shared protection, we are helping institutions across British Columbia strengthen their cybersecurity posture and build long-term resilience.

Centralized Logging: From Pilot to Provincewide Implementation

Thanks to funding from the Ministry of Post-Secondary Education and Future Skills, BCNET successfully launched a Centralized Logging pilot. This is a foundational step toward improved threat detection and response capabilities. Special thanks to Camosun College and Okanagan College for their active participation and valuable insights during the pilot phase.

This solution enables efficient, centralized log collection and real-time monitoring, facilitating rapid identification of anomalous activities and supporting post-incident forensic investigations.

Enhancing the SIEM Service: Collaboration, Automation, and Sustainability

BCNET continued to advance the capabilities of our Security Information and Event Management (SIEM) service through collaborative innovation and thoughtful planning. In partnership with NREN peers including RISQ and ORION, we are enhancing SIEM services across the national research and education network.

Milestones and Highlights

National Cybersecurity Assessment Program

We completed the third year of the National Cybersecurity Assessment (NCA) with 100% member participation in British Columbia—a significant achievement that underscores the collective commitment to continuous improvement and shared responsibility.

Incident Response & Retainer Service Enhancements

We have implemented automated reporting for assessment activities, dramatically reducing turnaround times and enabling institutions to quickly pinpoint and address areas of greatest need.

Improved Access to Support Resources

To better support our community, BCNET launched a new support and ticketing system. This new improvement has made it easier for members to submit support requests and access quick, expert solutions to any problems they may encounter.

SHARED TECHNOLOGY SOLUTIONS & ERP

SHARED TECHNOLOGY SOLUTIONS & ERP

Shared Technology Solutions & ERP continue to drive innovation, efficiency, and service excellence across British Columbia’s higher education and research landscape. By pooling expertise, infrastructure, and resources, our collaborative service delivery model helps members reduce duplication, enhance operational effectiveness, and focus on their institutional missions.

Curriculum and Catalogue Management System (CCMS) Initiative

BCNET is leading a collaborative, sector-wide initiative to implement a sectorial solution for a Curriculum and Catalogue Management System (CCMS), in partnership with the Ministry of Post-Secondary Education and Future Skills and 16 participating institutions. As a key enabler of the Ministry’s Digital Learning Strategy, the CCMS initiative is modernizing how programs and courses are proposed, governed, and published, strengthening consistency, transparency, and accessibility across the sector.

By coordinating procurement, implementation, and sector-wide collaboration, BCNET is helping institutions streamline academic operations, reduce duplication, and improve access to accurate academic

information for learners. The initiative supports greater alignment across B.C.’s public post-secondary system while ensuring institutions retain autonomy over their academic decision-making. It also lays critical groundwork for future interoperability across academic administrative and learner-facing systems and supports a more connected, responsive, and sustainable digital infrastructure for post-secondary education in the province.

The CCMS initiative is transforming how B.C. institutions manage and share academic programs.

ERP Transformation Initiative

BCNET, in partnership with the Ministry of Post-Secondary Education and Future Skills and 10 participating post-secondary institutions, is advancing a sector-wide transformation of the Colleague ERP consortium. This ministry-funded initiative is enhancing governance across institutions and the system as a whole, improving the shared ERP support model, and optimizing the platform to better align with institutional priorities. The project is fostering greater operational efficiency, strengthening collaboration, and supporting the adoption of more standardized and streamlined business practices across member institutions.

A major focus of the initiative is on building clear and sustainable pathways toward future-ready enterprise solutions, reducing technical debt, minimizing customizations, and preparing institutions for long-term scalability and innovation. Through a combination of collaborative governance, targeted process improvement, and forward planning, this work is laying the foundation for a more agile, cost-effective, and integrated digital environment across B.C.’s post-secondary system.

MEMBER ENGAGEMENT

MEMBER ENGAGEMENT

HOW WE MEASURE OUR SUCCESS

Looking Ahead: CONNECT 2025—From Y2K to Today

Thank you to the 2024/25 planning committee for all your hard work in making this happen. As one of the largest IT and higher education technology conferences in Canada, the 2025 Summit carried special significance: it was the 25th anniversary of BCNET CONNECT.

All 25 of B.C.’s post-secondary institutions were represented, alongside 47 sponsors and 36 exhibitors. More than just a conference, CONNECT 2025 was a powerful reminder that in an age of emerging technologies and global uncertainty, collaboration isn’t optional—it’s essential.

“As we look ahead,” said BCNET CEO Bala Kathiresan, “we are reminded that at the heart of collaboration lies a simple but profound principle—every voice deserves to be heard, every perspective

understood, and every individual recognized for their potential to contribute to a shared purpose. At BCNET, we believe in the transformative power of collaboration. Because when we lean into each other’s strengths, we don’t just succeed—we transform.”

“CONNECT 2025 was a powerful reminder that in an age of emerging technologies and global uncertainty, collaboration isn’t optional—it’s essential.”

As we reflect on a quarter-century of connection and innovation, we are filled with gratitude for our members, speakers, sponsors, and volunteers. Thank you for making CONNECT 2025 a celebration to remember—and for inspiring a collaborative future for B.C.’s higher ed and research community.

Milestones and Highlights

June Member Forum

The June Member Forum at Okanagan College in Kelowna was a great success, drawing 62 delegates overall. The CIO roundtable, in particular, saw active participation from 21 attendees.

October Member Forum

The October Member Forum, held in Vancouver on October 30, brought together 79 participants for a day of engagement and networking. Ahead of the forum, the second CIO Summit convened, gathering 18 participants

International Women’s Day Lunch

On March 7, 2025, in partnership with SheLeadsTech, BCNET hosted an International Women’s Day Lunch. It was a sold-out event with 96 participants, celebrating the IWD 2025 theme: Accelerate Action.

CEUG Conference

BCNET was proud to support the Canadian Ellucian Users Group (CEUG) in hosting the CEUG Conference on November 13-14, 2024, at the Sheraton Wall Centre in Vancouver. The event was a great success, bringing together 400 attendees from across Canada.

“Collaboration, innovation, and responsiveness are more than just our values; they are the foundation of how we serve our members. Every initiative we undertake is shaped by the insights and needs of the BC higher education and research community. I’m proud to support our members and amplify their voices, ensuring they remain at the heart of everything we do.”

THE FRONTIERS OF SCIENCE

BCNET’s Role in Advancing World-Class Research

At the heart of scientific innovation in Canada is TRIUMF, the nation’s particle accelerator centre. Located on UBC’s campus, it is home to the world’s largest cyclotron of its kind. For over 50 years, TRIUMF has driven global discovery in particle physics, life sciences, and advanced materials, welcoming over 1,000 visiting scientists annually.

BCNET plays a key role in supporting TRIUMF by providing the critical networking infrastructure that allows sharing vast amounts of data with researchers worldwide. BCNET’s Advanced Research and Education Network not only supports high-speed data transfers but also offers enhanced security and monitoring, ensuring that TRIUMF’s research can proceed without interruption. BCNET facilitates procurement, training, and cybersecurity services, enabling TRIUMF to maintain its operations smoothly. This includes connecting TRIUMF with CANARIE and other

National Research and Education Networks (NRENs), fostering deeper collaboration across Canada and around the world.

“TRIUMF is a cornerstone of scientific innovation in Canada,” says Bala Kathiresan, President and CEO of BCNET. “Their pioneering work in particle physics, medical isotopes, and next-generation technologies epitomizes the kind of cutting-edge research that BCNET is proud to support. It’s a privilege to have TRIUMF as a member of BCNET, and we are committed to continuing to strengthen and improve the advanced network infrastructure and services that enable their groundbreaking discoveries.”

Strong support from government, including the 2024 announcement of a historic investment of \$399.8M in the federal budget, have provided support for the development of new facilities, such as the Institute for Advanced Medical Isotopes (IAMIs) and the

Advanced Rare Isotope Laboratory, which will enhance TRIUMF’s research capabilities.

“It’s a privilege to have TRIUMF as a member of BCNET, and we are committed to continuing to strengthen and improve the advanced network infrastructure and services that enable their groundbreaking discoveries.”

With new funding in place, TRIUMF and BCNET are working together to ensure that Canadian science remains globally competitive, collaborative, and impactful.
