

Shared IT Services for Higher Education & Research

Conference 2018

# BCNET Network Services

A Technical Dive into BCNET's Network Services

# Agenda

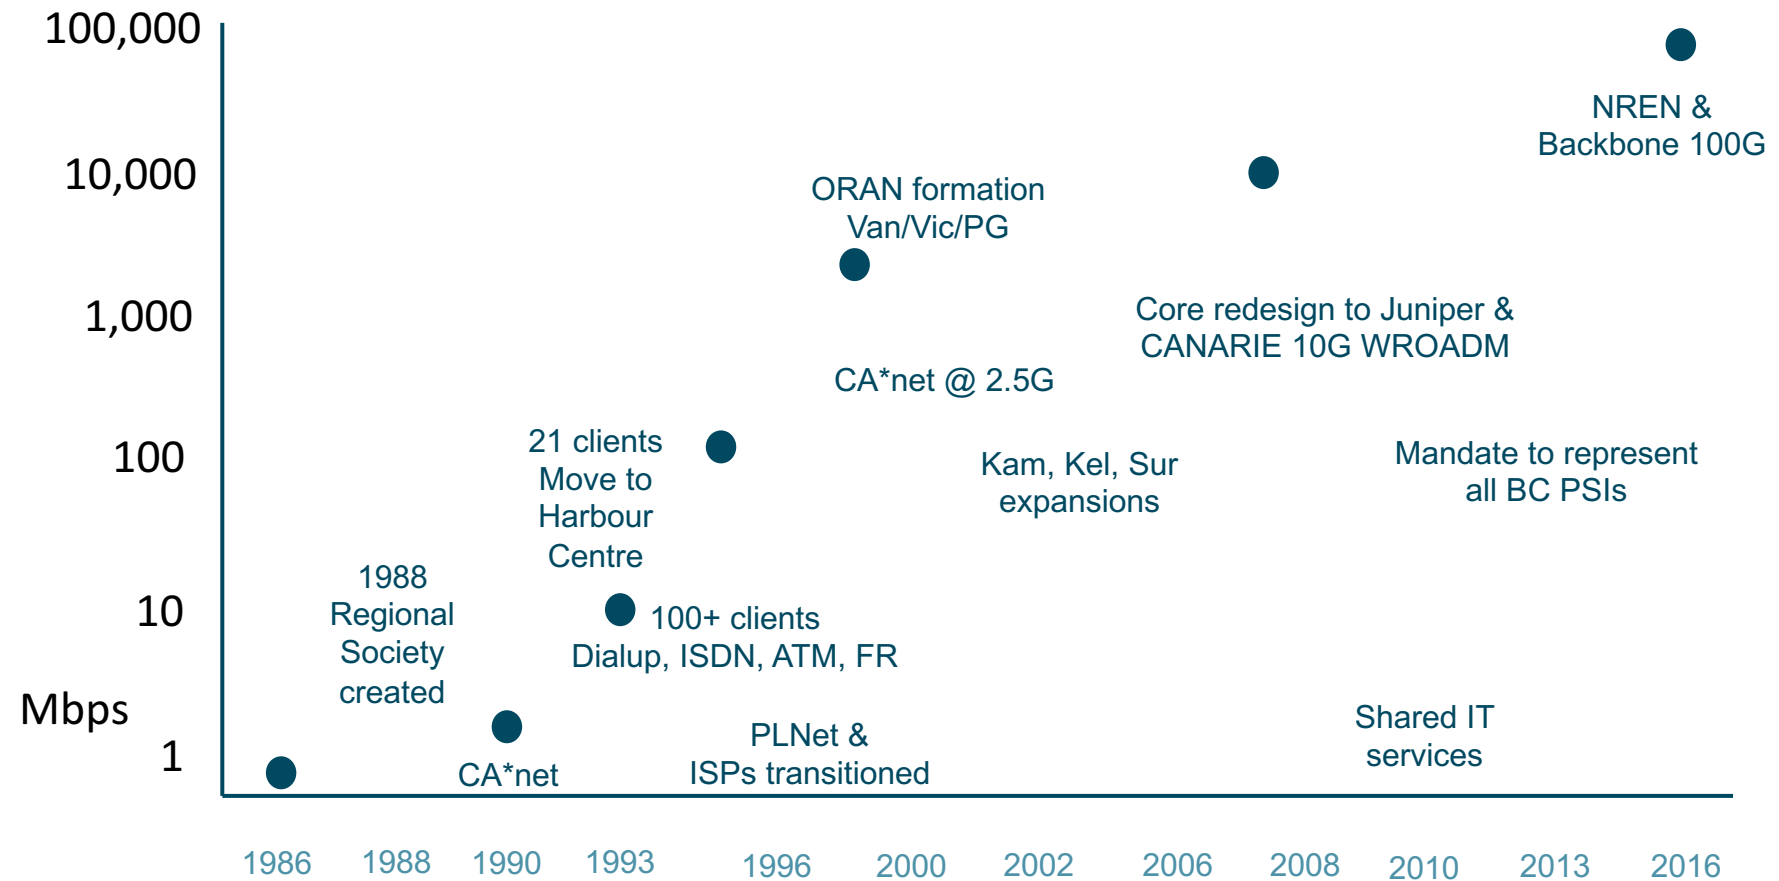

Marilyn Hay

Manager, Network Services

[marilyn.hay@bc.net](mailto:marilyn.hay@bc.net)

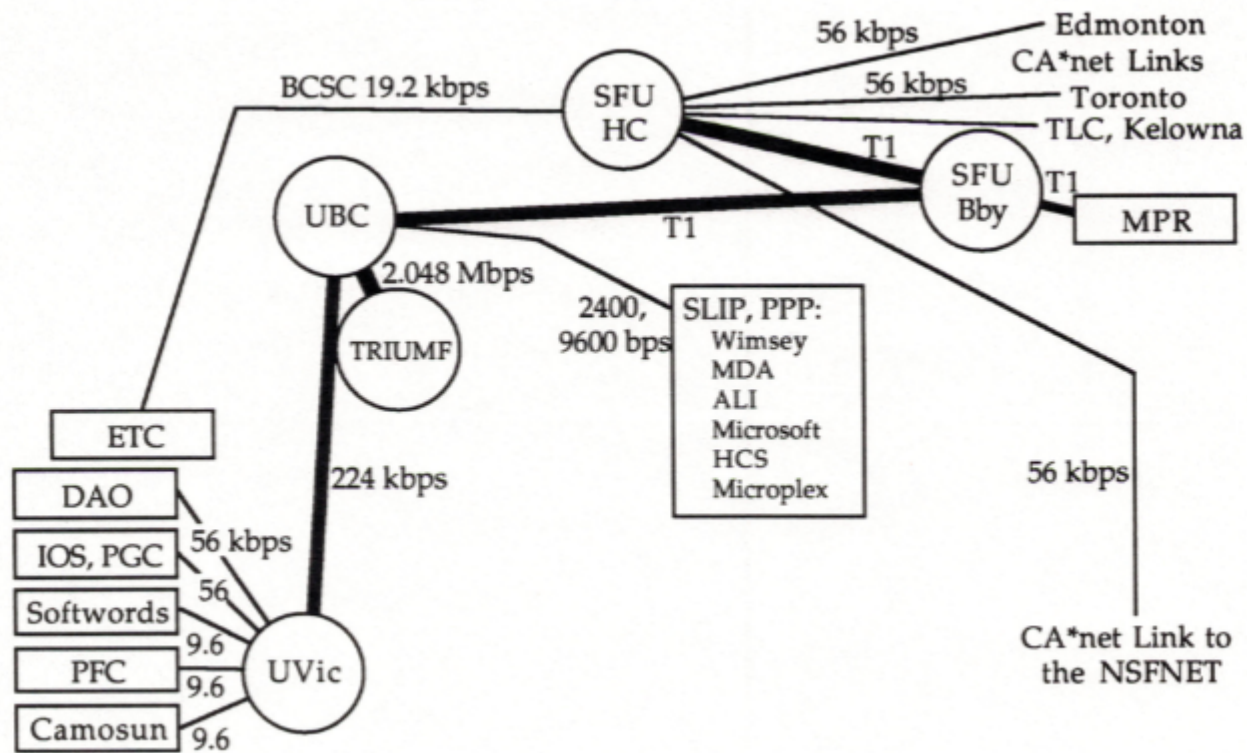

1. BCNET Then
2. Network Now
3. Service Layers
4. Support

# BCNET Network Growth

1986: 3 Research Universities  
56Kbps + 1.5Mbps

# BCNET Network 1991

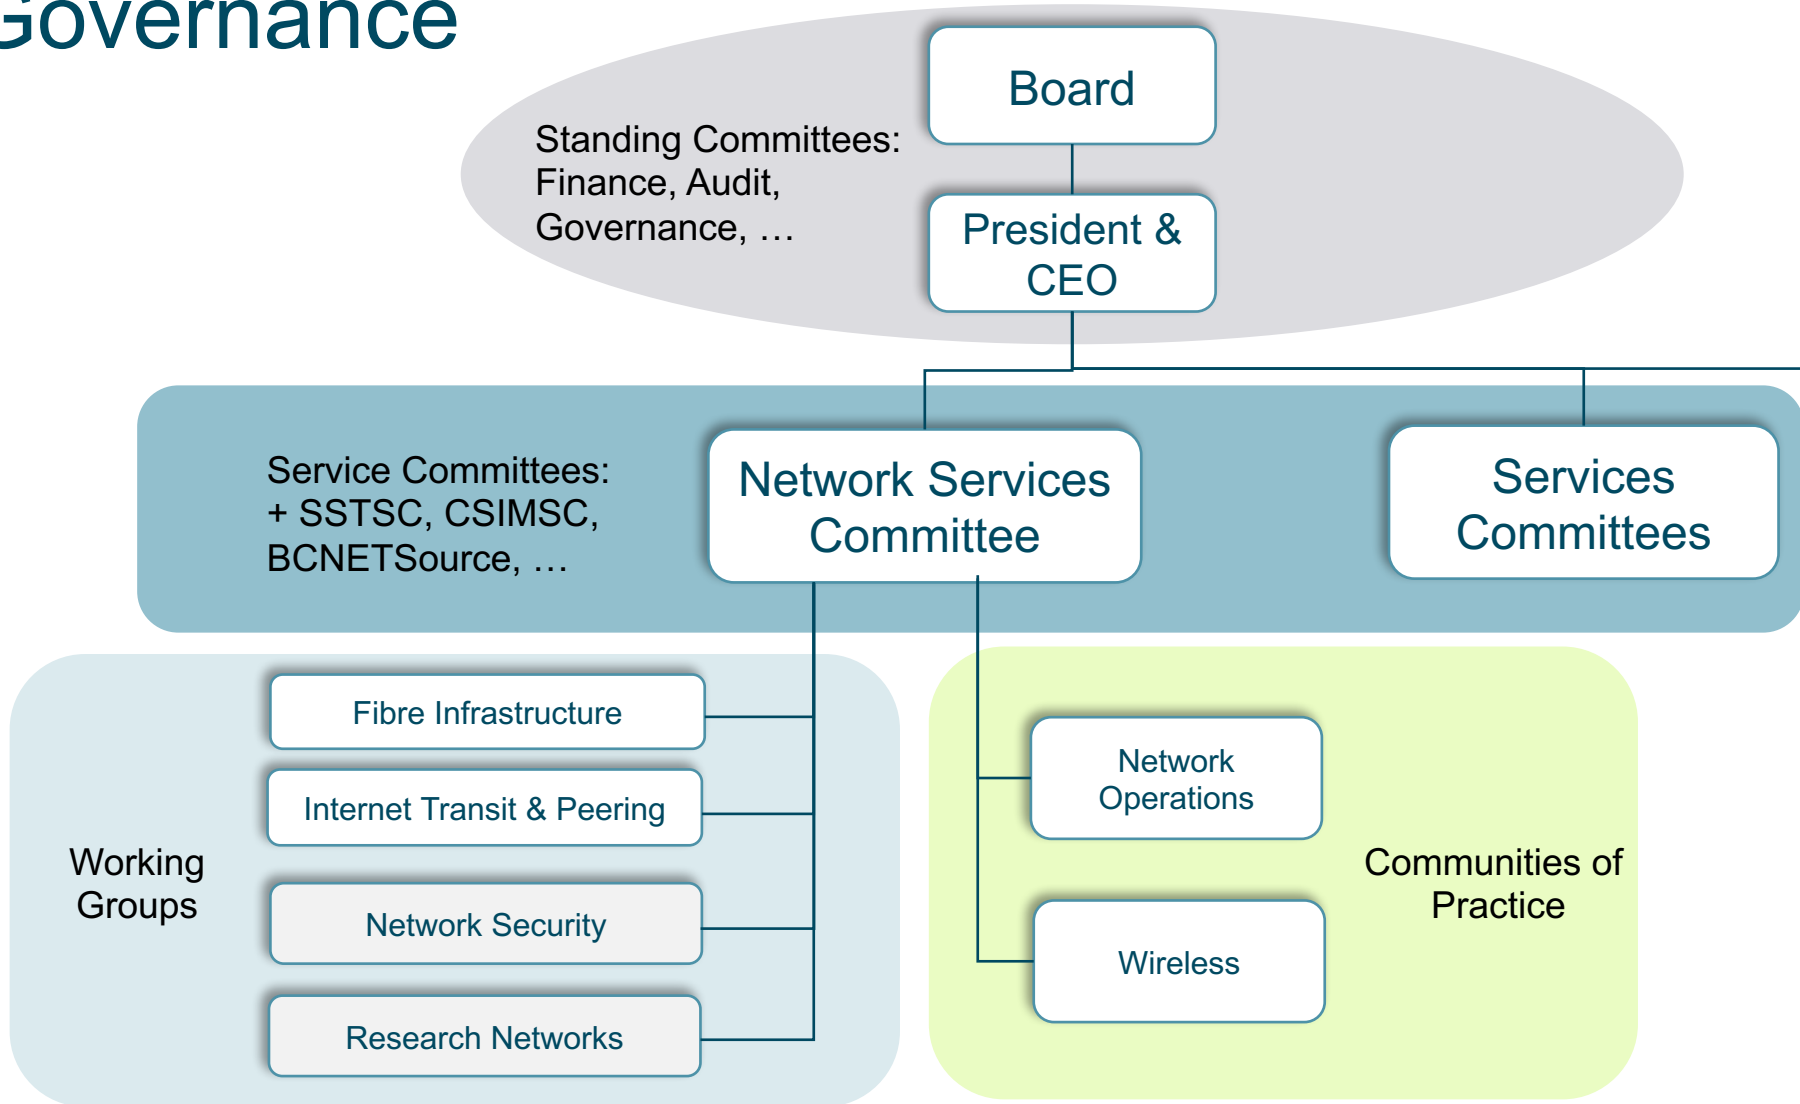

A decorative graphic at the top of the slide featuring a network of blue lines and dots on a dark blue background, resembling a fiber optic or data network.

# Vision

We will deliver, operate and advance network infrastructure to support education, research and innovation in British Columbia.

# Governance

# Exchange Infrastructure

- University, College, and Institute
- City and Municipality
- Provincial government

# Metro Networks

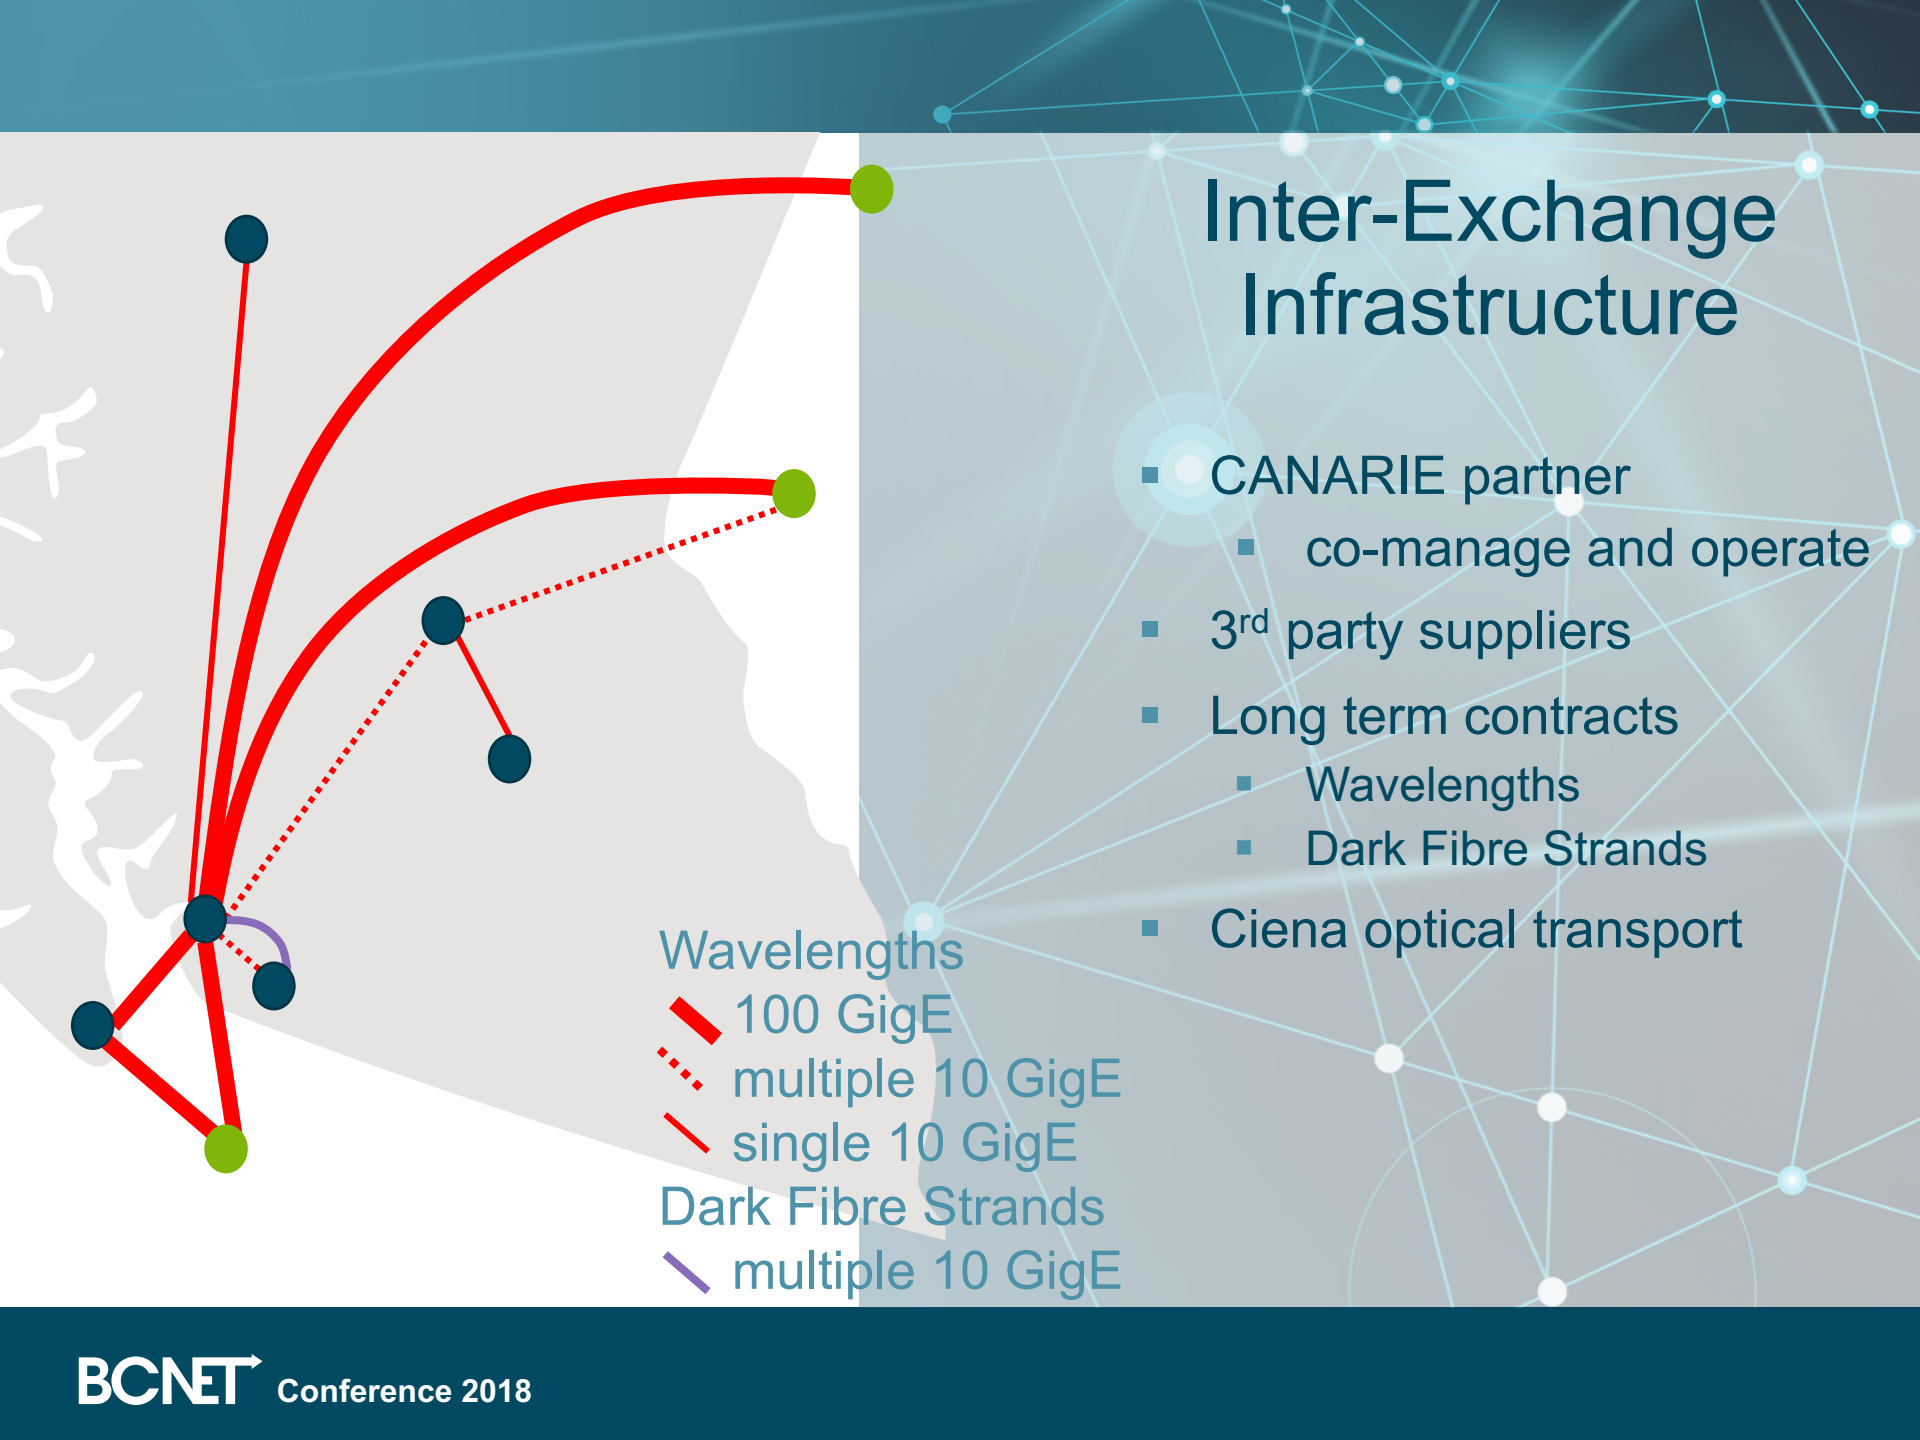

Fibre strand network in each Exchange metro area

Total fibre asset =  
9,980 Fibre Kilometers

includes WAN and member connections

- KAMTX 307 FKm
  - KCN: Kamloops Community Network
- KELTX 280 FKm
  - City of Kelowna
  - 3<sup>rd</sup> party supplier
- PGTX 30 FKm
  - City of Prince George
- Vancouver 3,400 FKm
  - SURTX and VANTX
  - 3<sup>rd</sup> party suppliers
- VICTX 2,700 FKm
  - 3<sup>rd</sup> party suppliers

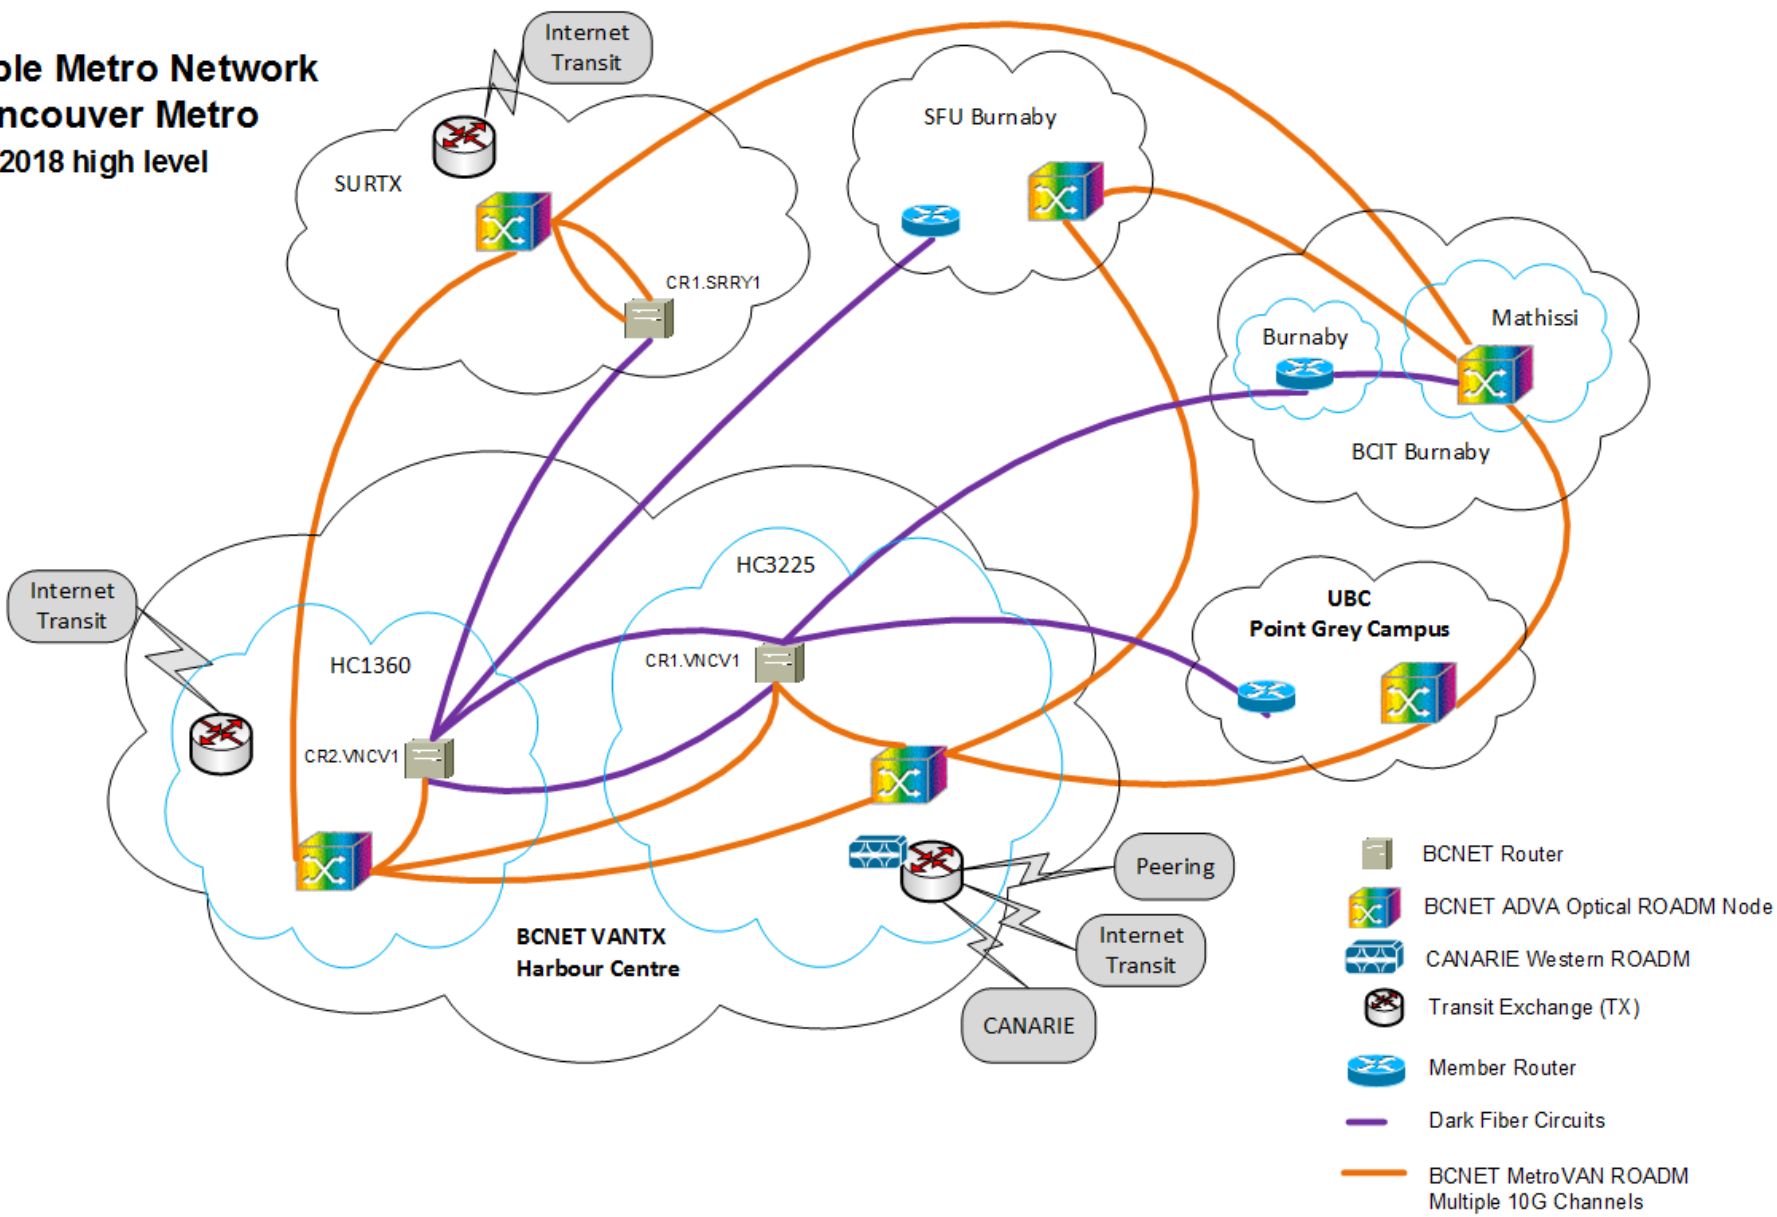

# Inter-Exchange Infrastructure

- CANARIE partner
  - co-manage and operate
- 3<sup>rd</sup> party suppliers
- Long term contracts
  - Wavelengths
  - Dark Fibre Strands
- Ciena optical transport

Wavelengths  
■ 100 GigE  
■ multiple 10 GigE  
■ single 10 GigE  
Dark Fibre Strands  
■ multiple 10 GigE

# Example Metro Network Vancouver Metro 2018 high level

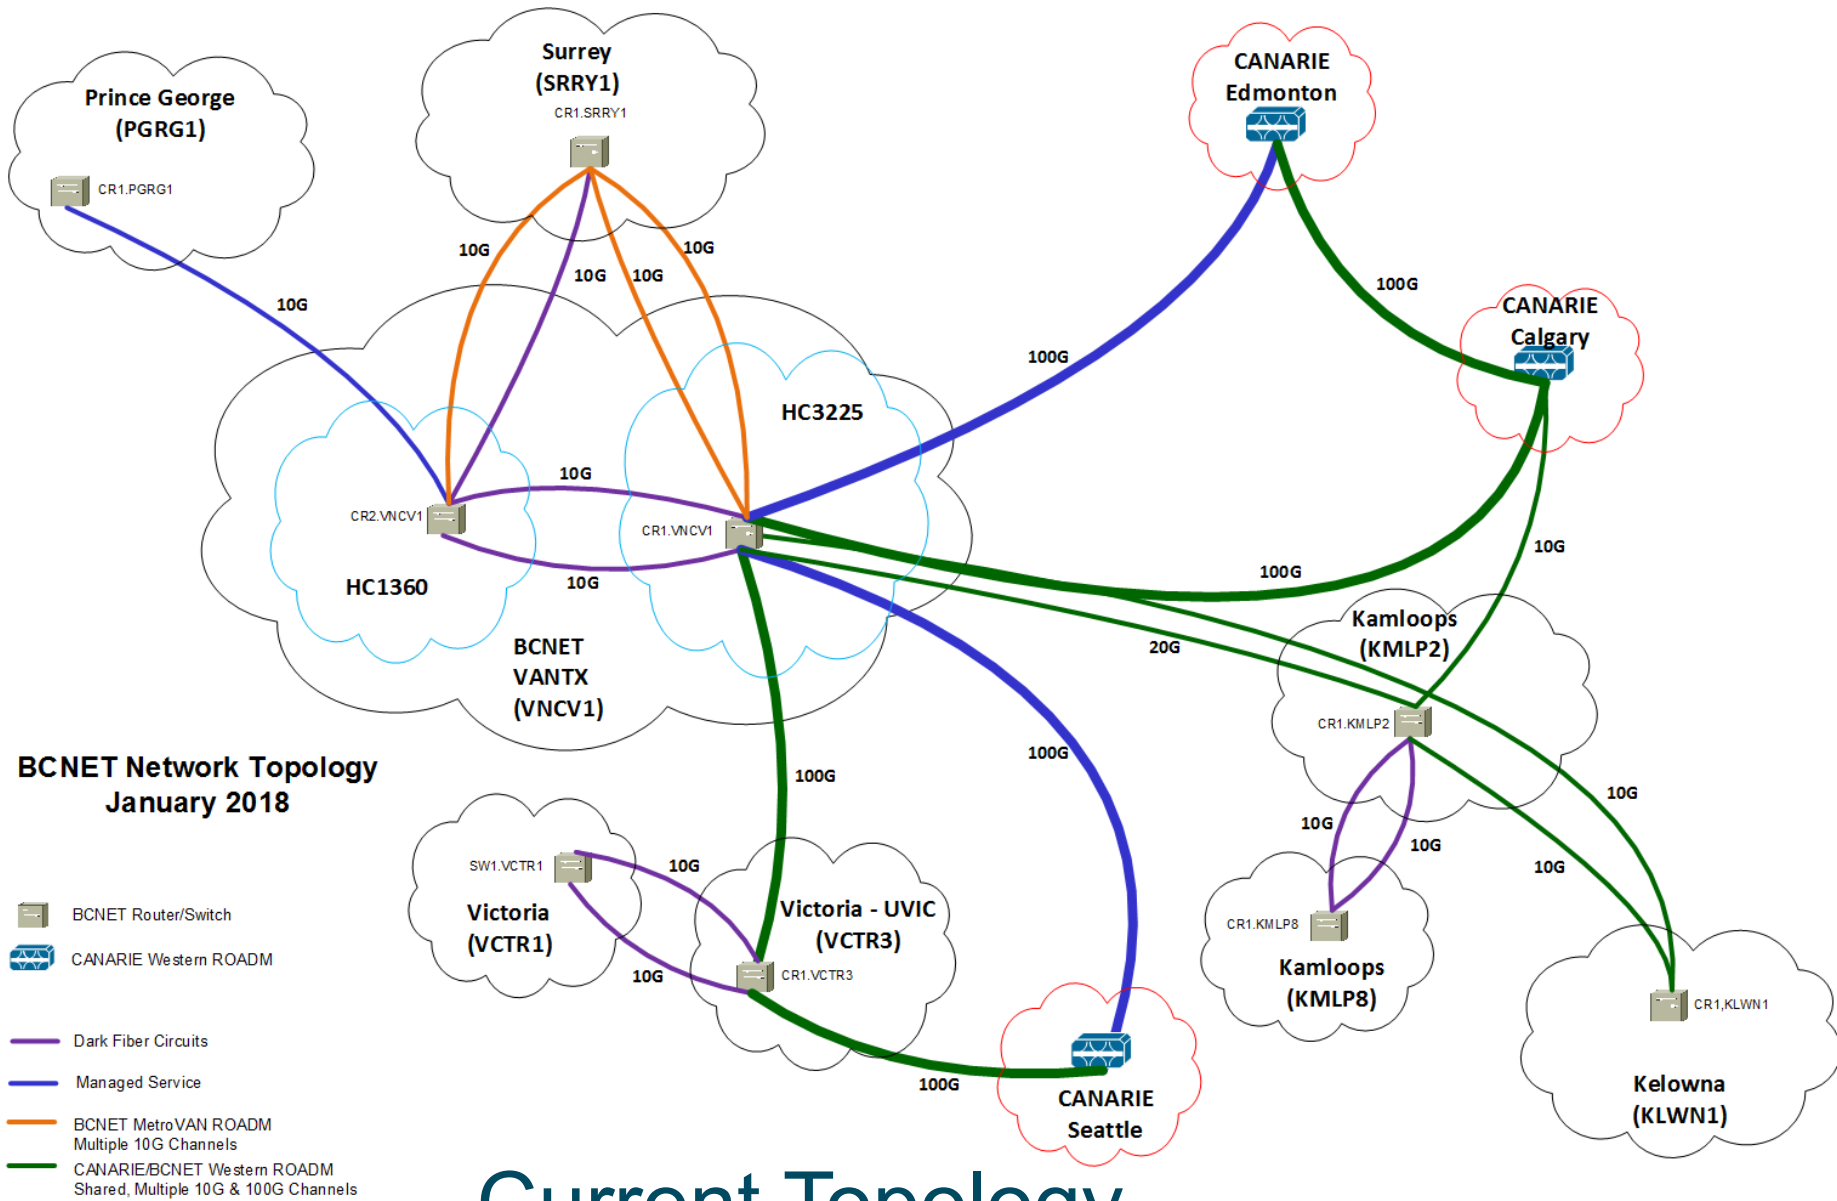

# NREN – Canada's National Research and Education Network

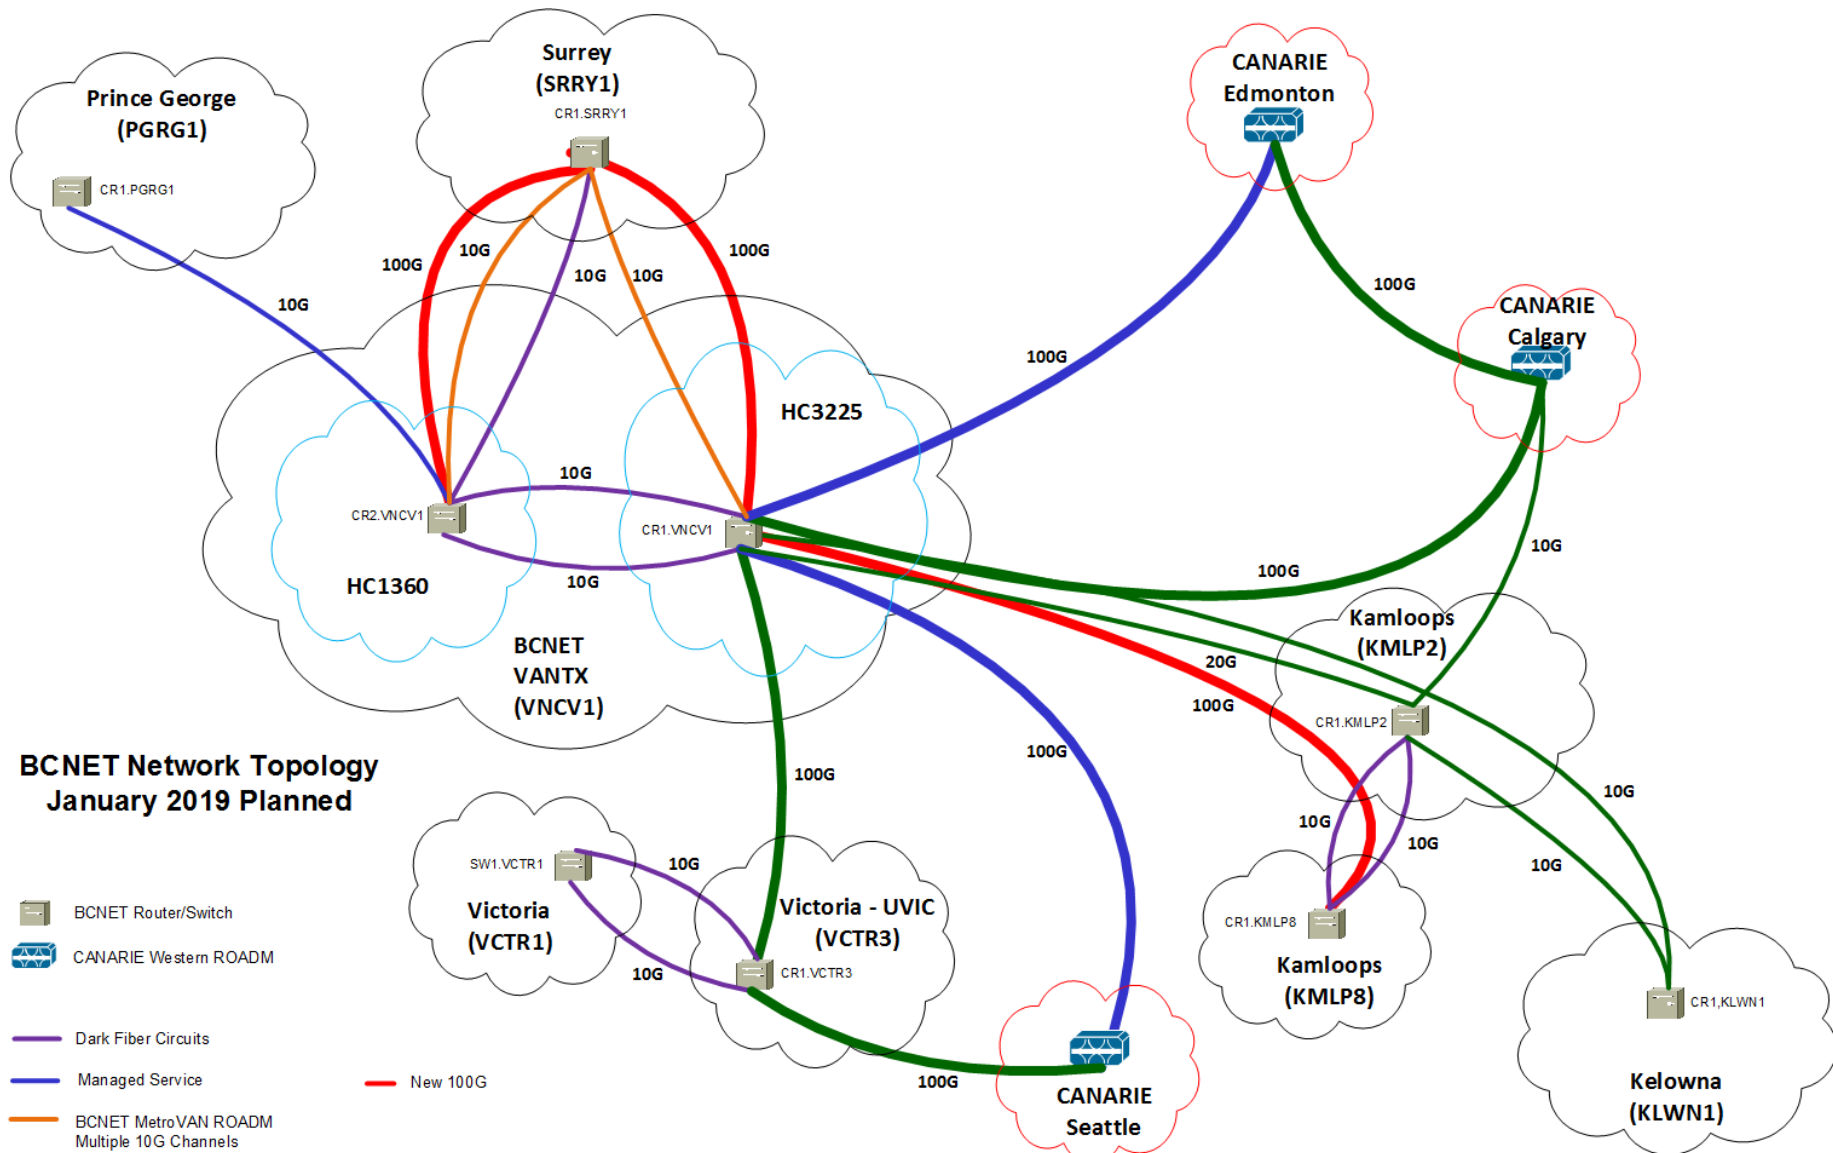

# Core Network Architecture - Routing

- 3 categories of upstream connectivity  
Provisioned through Routing Instances
  1. **Internet Transit** – TX
  2. **Peering** – IX  
Local, Caches, BGP communities for tagging
  3. **Advanced Research Network** – ORAN backbone  
Jumbo frames
- Exchange routers in full IBGP mesh peering
- ISIS and MPLS with LDP across the core
- Full IPv4 and IPv6
- All services at all Exchanges

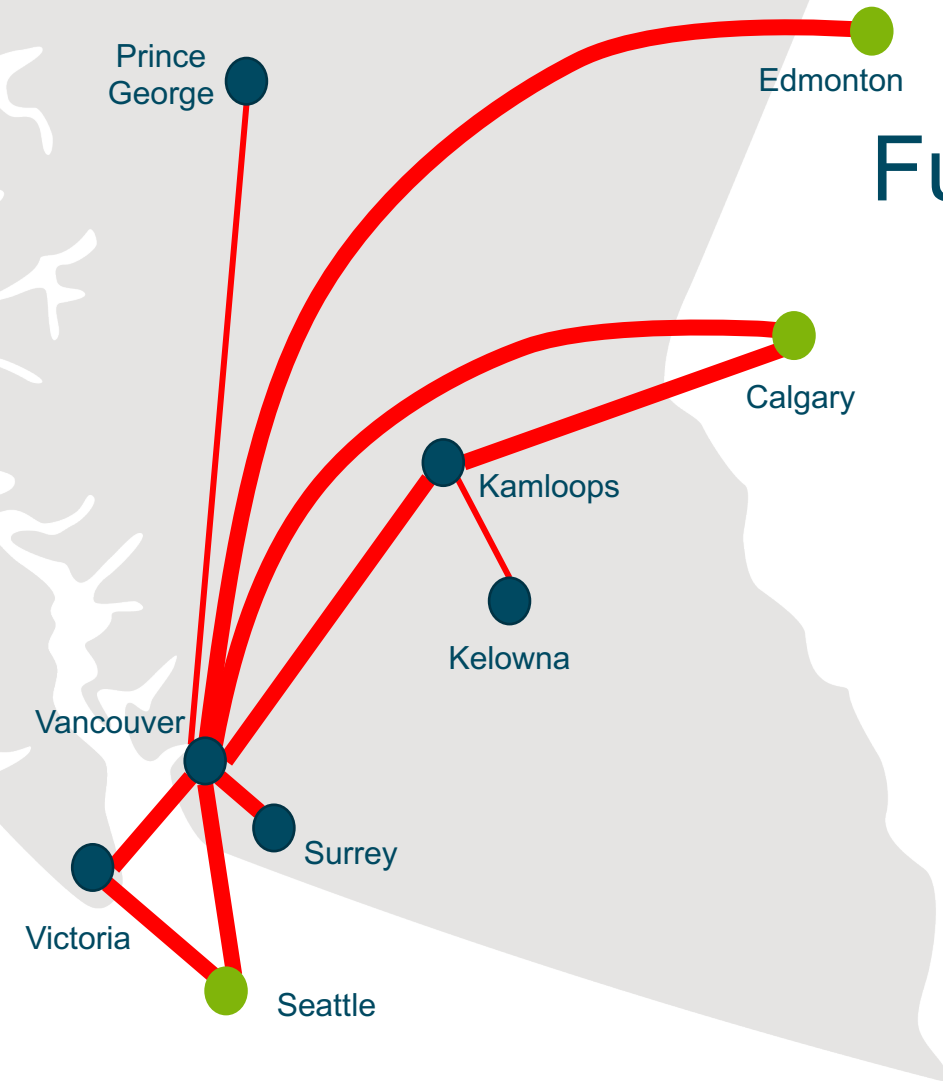

# Current Topology

# FY1819 Projects

# Future Architectural Plans

# Future Architectural Plans

- Full MPLS core  
Requires alternate paths
- Review routing platform
- Options for member multiple diverse connections

Research Networks Working Group

# Network Services Catalogue

## Physical Access

- Fibre Connection
- Fibre Cross Connect
- Point to Point Ethernet

## Layered Services

- Advanced Network
- Internet Transit
- Transit Exchange
- Virtual Router

Core Services

# Member Fibre Connections

Vancouver area : 2000

Victoria : 2000

Prince George : 2001

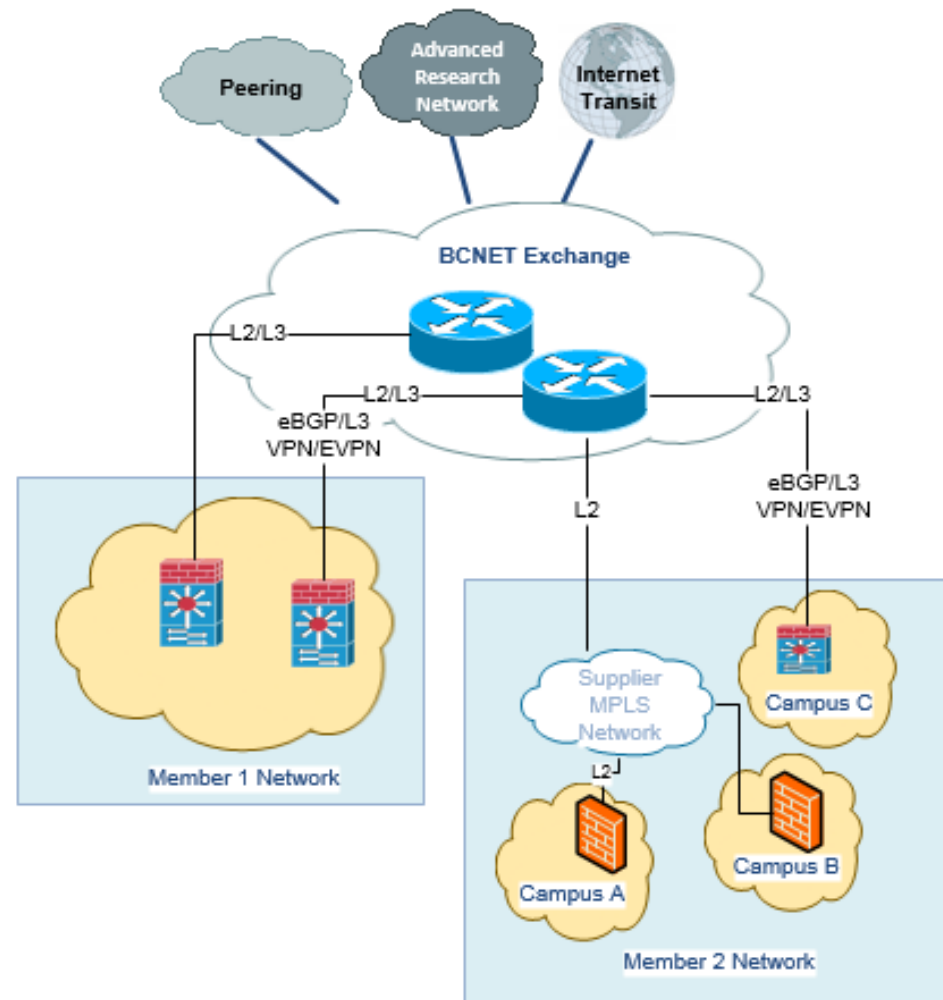

Kamloops and Kelowna : 2005

14 Institutions

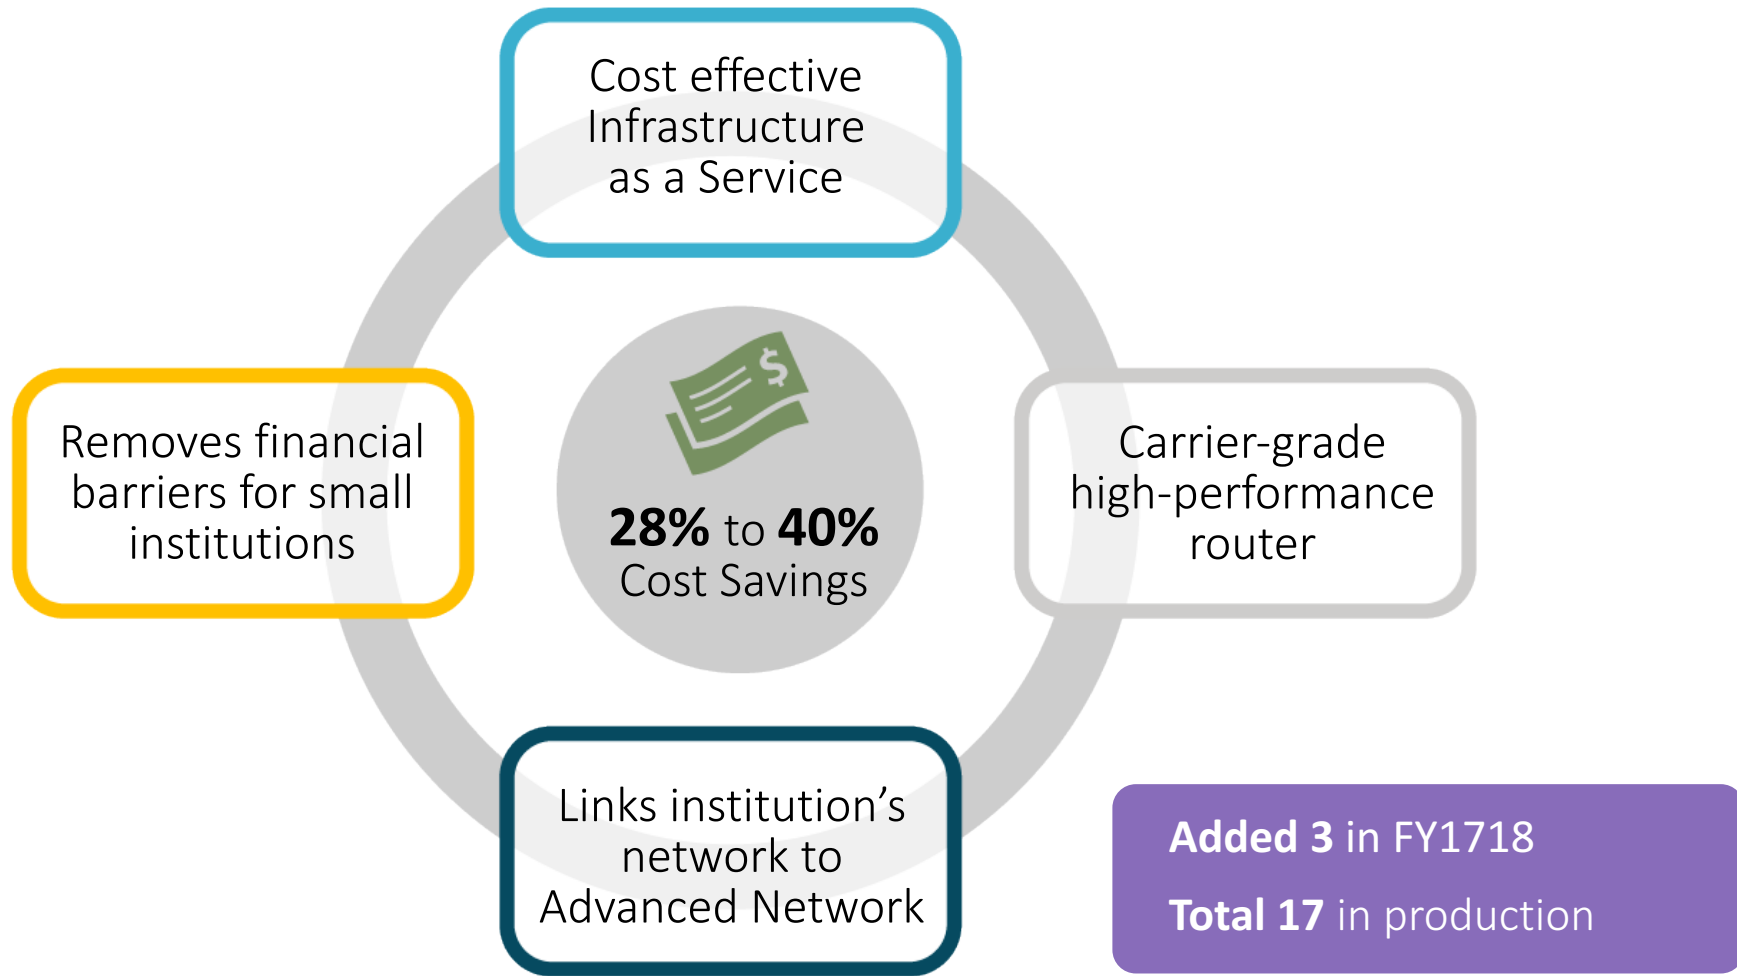

Total fibre asset = 9,980 Fibre Kilometers

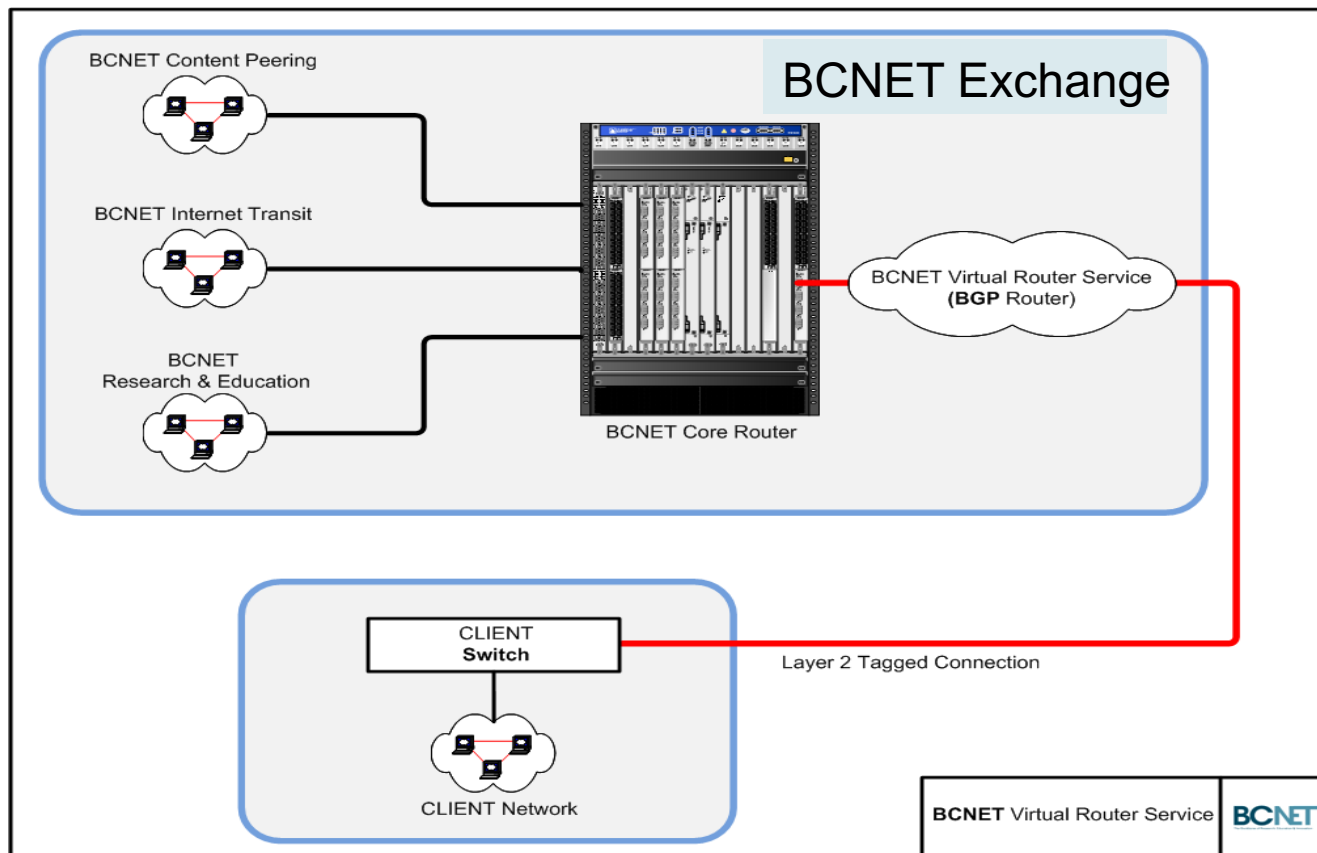

# Member Ethernet Connections

- 3<sup>rd</sup> party supplier connections
- 10 M – 1 G – 10 G – 100 G
- L2
  - Point-to-point
  - Point-to-multipoint
  - VLAN delivery
  - MTU frame sizes
- L3 as well
- 3 virtual instances transit, peering, research

# Virtual Router Service

## Virtual Router Setup

- Based on Juniper MX platform
- Supports OSPF, BGP, ASNs
- Local accounts
- Rancid maintained backups

# Network Security

- Best Current Practices
  - Filtering
- DDoS Mitigations
  - CIRA D-Zone Anycast
  - Nessus Vulnerability Scanning
  - RTBH – to be developed

Network Security Working Group

# Internet Transit Service

- Aggregate purchase for all members
- Lower total cost
- Traffic optimization
- Available at each Exchange
- IPv4 and IPv6
- Exchange to Exchange failover
  - GRE tunnels
  - increased resiliency

100% Availability

# Internet Transit Traffic

- RFPs for suppliers
- Cost continues to drop

- Traffic doubles every 2 years
- Internet Transit & Peering Working Group

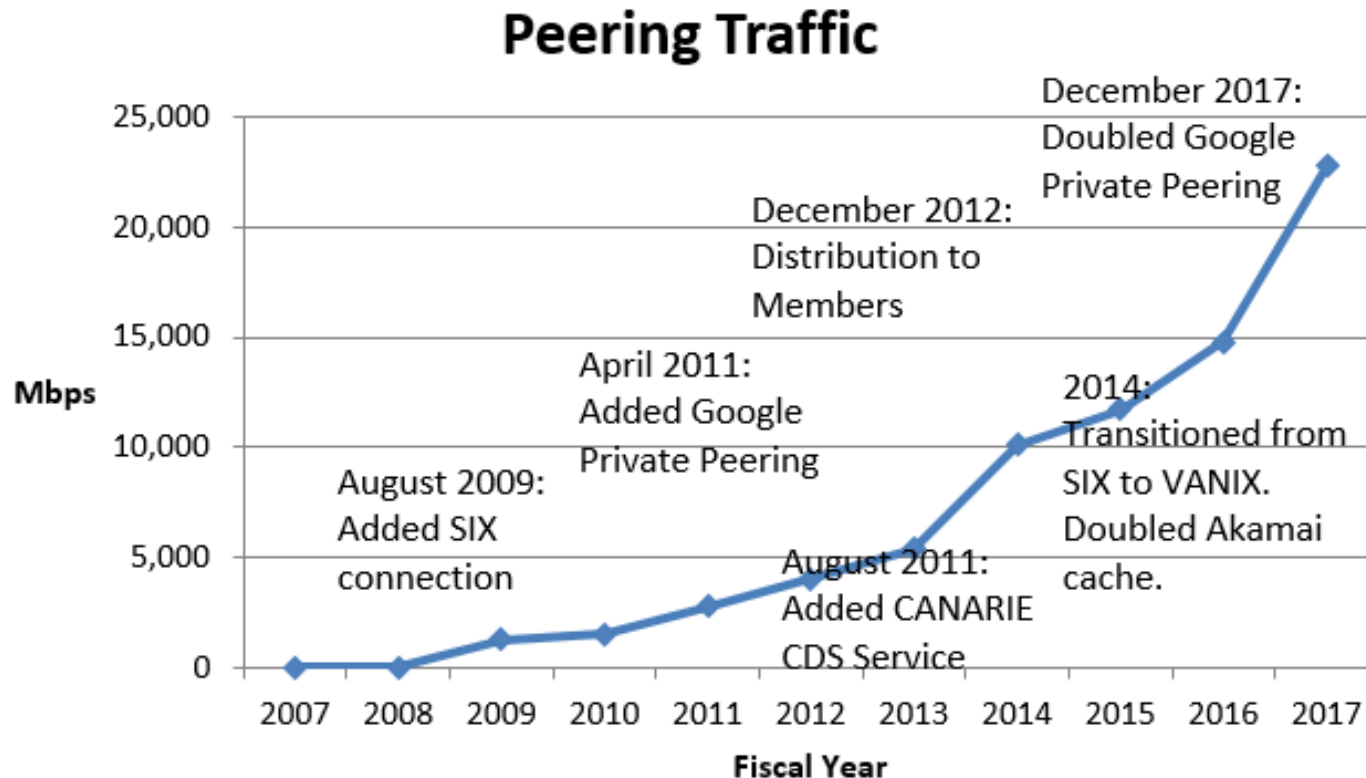

# Peering Services

- Distributed across Advanced Network
- BGP Peers
  - CANARIE Content Delivery Service – CDS  
Amazon, Box.net, D2L, FB, MS, Yahoo!, ...
  - BCNET Local Exchanges  
Limelight, Novus, ...
  - Vancouver Internet Exchange – VANIX  
Cloudflare, OpenDNS, Peer1, ...
- Caching Services
  - Nearby servers
  - Akamai, Apple, Google

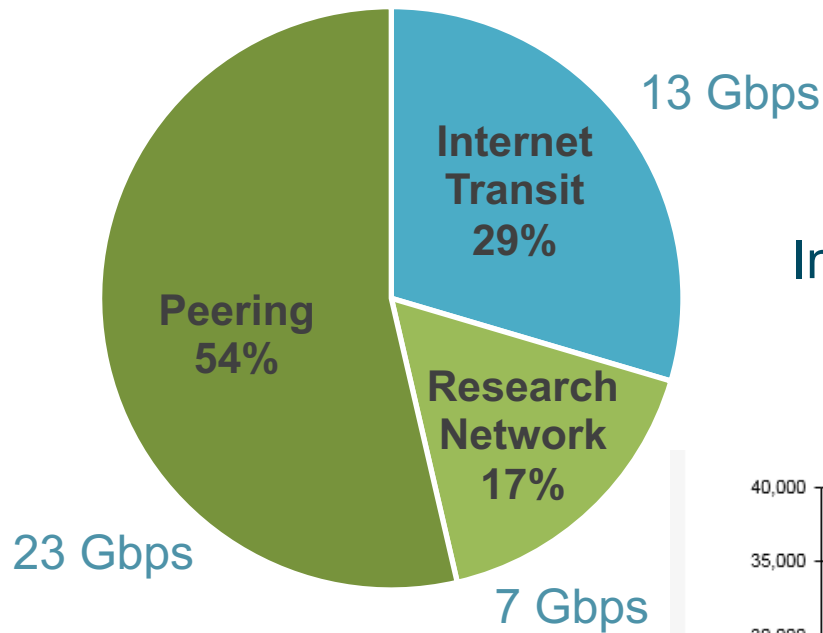

Bilateral routing agreements = improved user experience

# Peering Service Growth

- Akamai first installed 2001
- Apple Caching online in 2018
- \$1.7M avoided network costs for members over FY1718
- 54% of all traffic is on Peering

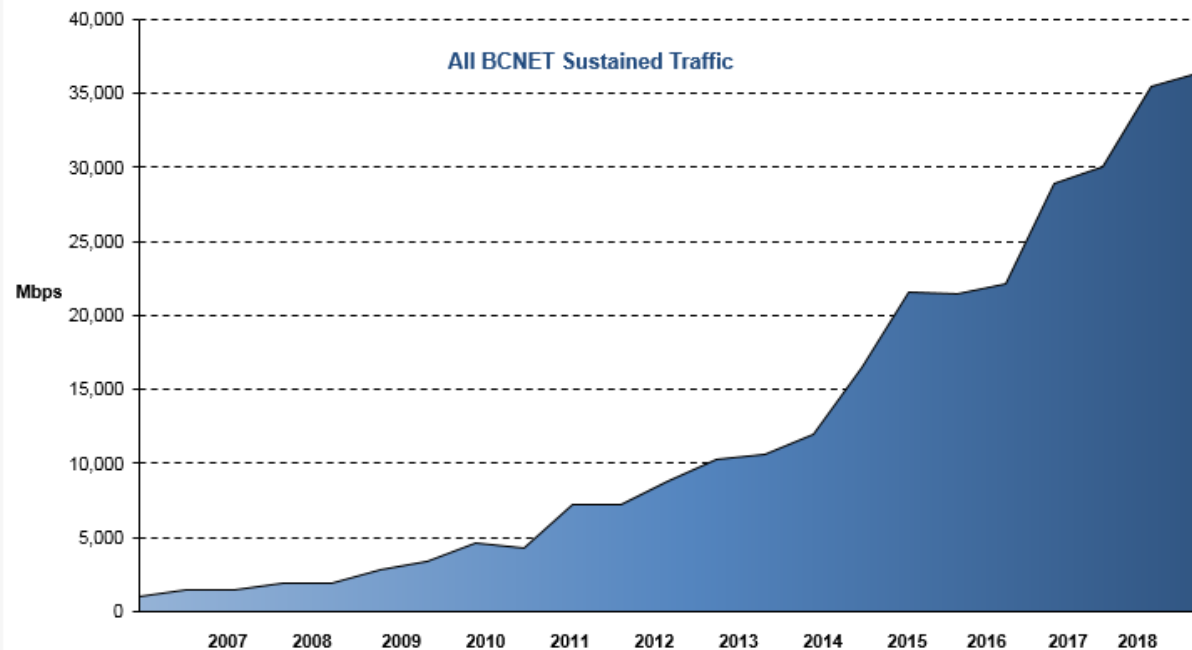

## Traffic Distribution FY1718

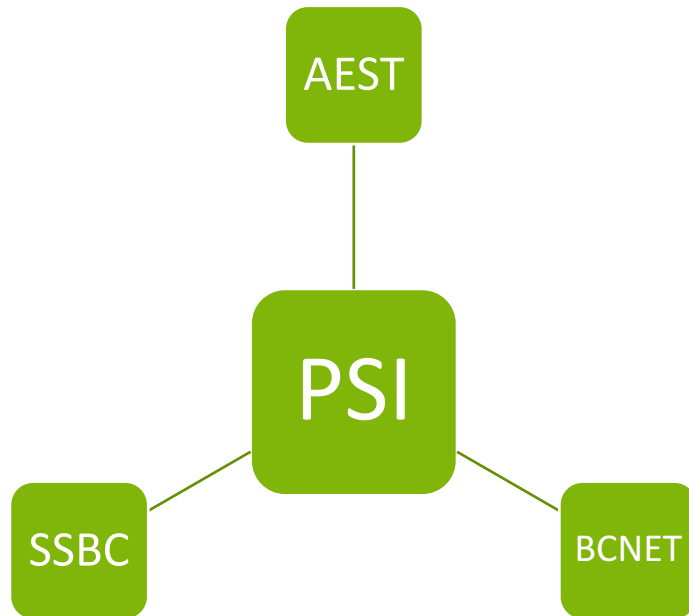

Approximate 25%  
traffic increase per year

## Network Traffic

Investment in Research Network + Peering =  
\$2.2 M annual avoided cost for members

# PSI Integration Project

Collaboration to allocate funding where required to support rural and remote connectivity

23% under budget

30 Gbps installed – 51% increase from budget

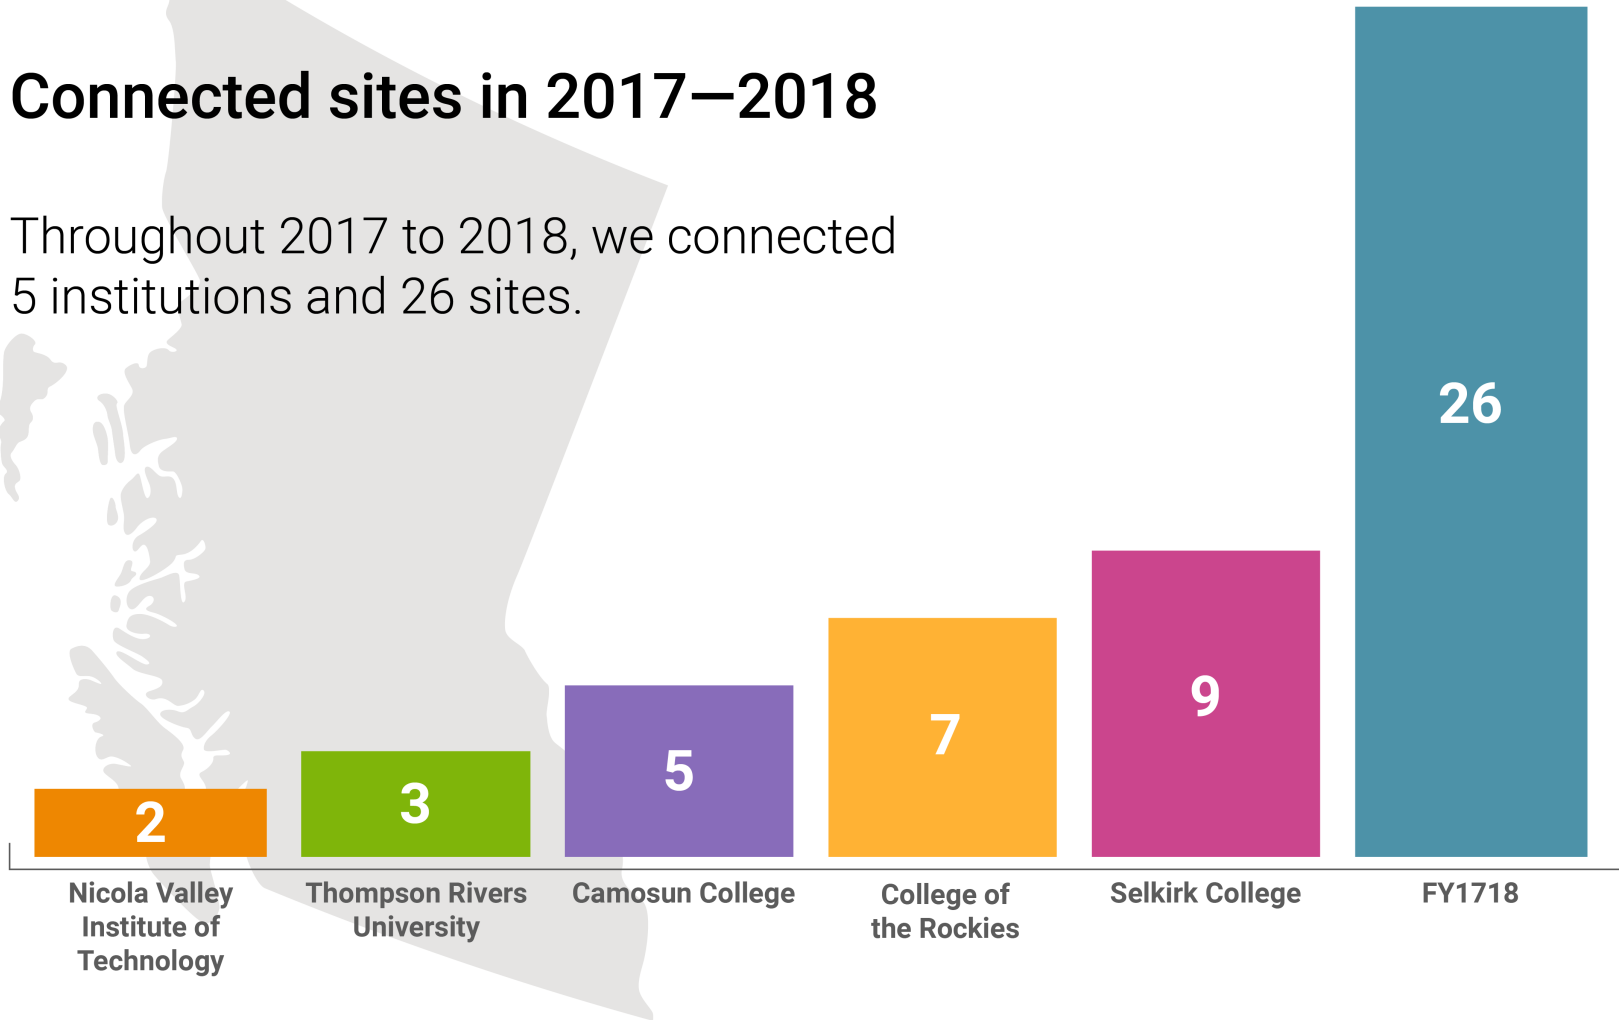

15 institutions in the entire project with ~90 campuses

60% complete to date

# PSI Integration Project – FY1718

## Connected sites in 2017–2018

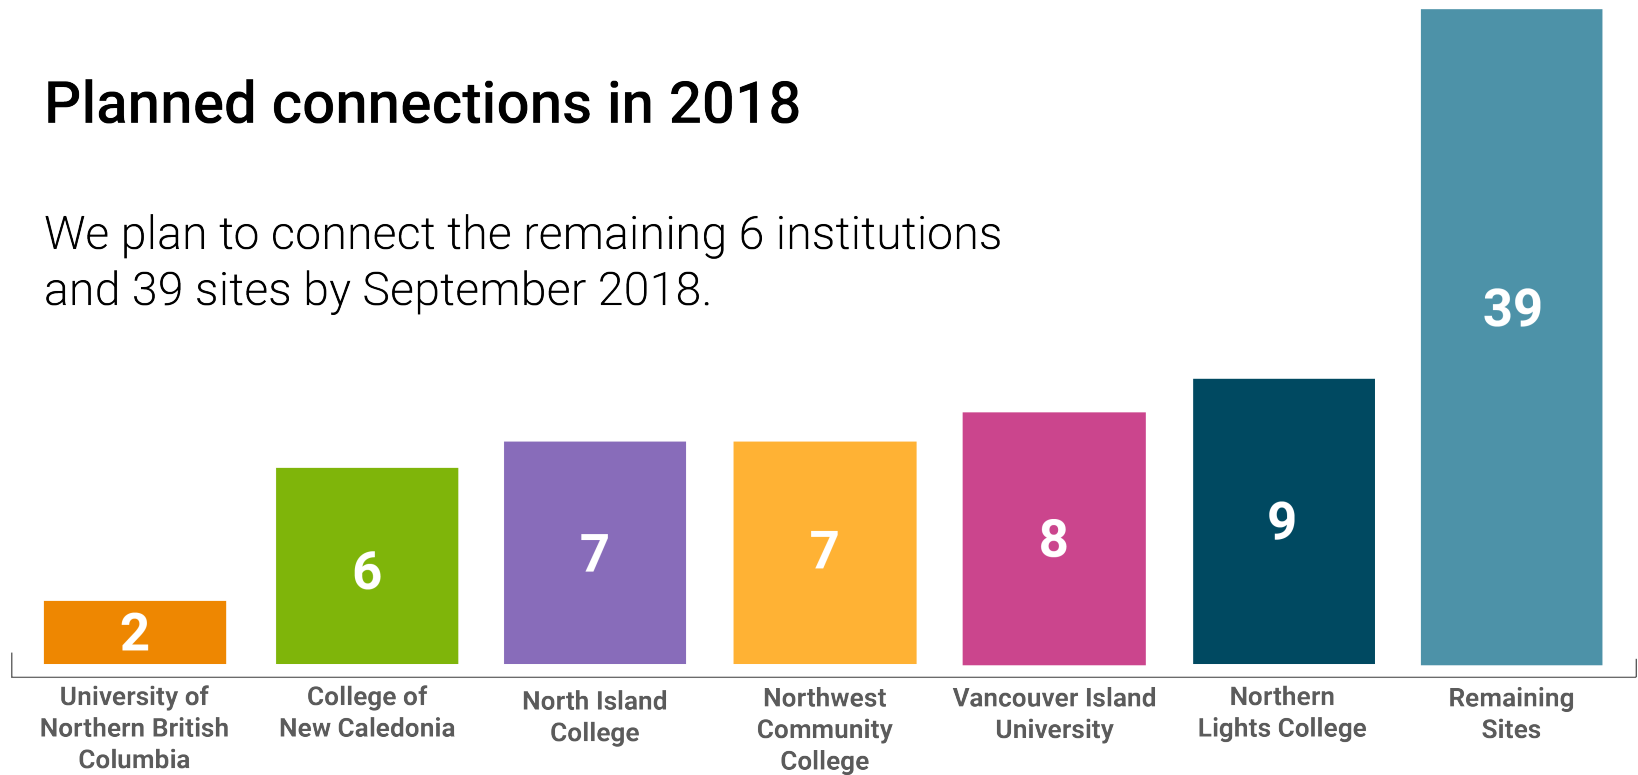

Throughout 2017 to 2018, we connected 5 institutions and 26 sites.

# PSI Integration Project – April to August

## Planned connections in 2018

We plan to connect the remaining 6 institutions and 39 sites by September 2018.

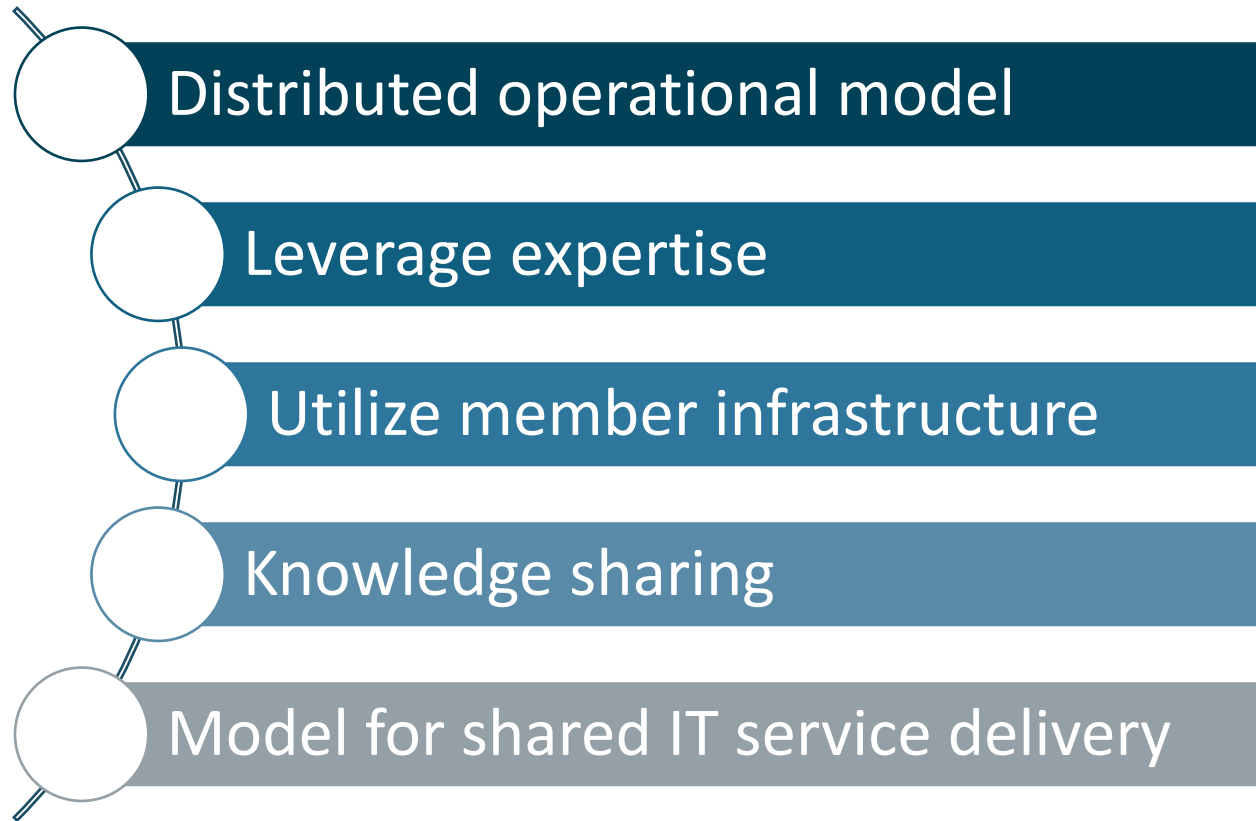

The number of organizations and sites connected to BCNET network have doubled in the last five years

	FY 12/13	FY 13/14	FY 14/15	FY 15/16	FY 16/17	FY 17/18
Network Site Connections	71	85	95	121	143	179
Organisations Connected	13	17	20	23	28	32

# Network Support

98% On 2017 Member Satisfaction Survey

# Client Portal

- BCNET

- Service Bulletins, Network Metrics
- Policies

- Member Services

- Network statistics
- Incident reports
- EduCloud Server metrics
- Service agreements

Monthly Traffic statistics

	Current	Maximum	Average	95th percentile
Outbound	2018-04-24 07:40: 4.78Mb/s	2018-04-23 13:15: 33.35 Mb/s	7.71 Mb/s	19.40 Mb/s
Inbound	2018-04-24 07:40: 8.71Mb/s	2018-04-23 18:10: 364.63 Mb/s	22.44 Mb/s	84.11 Mb/s
