

# BCNET

Shared IT Services for Higher Education & Research

## Conference 2017

## Cloudy... With A Chance of Usability

...what the future looks like and the challenges  
that lie ahead for enterprise cloud computing.

# CIO Panel Question 1 - All

- Share with us a bit about your institutions cloud strategy; including current state and future path forward and how it will help students?

# CIO Panel Question 2 - All

- What major challenges or hurdles have you encountered with enterprise cloud computing and how did you overcome them?

# CIO Panel Question 3 - Wency Lum

- Share with us, what we should be asking ourselves regarding cyber-security and cloud computing and why we all need to care?

# CIO Panel Question 4 - Mark Roman

- How will SFU's relationship with Compute Canada contribute to BC Higher Ed's cloud strategies and what benefits will there be for students, faculty and administrative staff?

# CIO Panel Question 5 - Jennifer Burns

- A) Briefly outline how business transformation and process improvement is being managed at UBC to ensure success of multiple cloud, hybrid and on-premise solution implementations over the next 5 years
- B) How will Educloud 2.0 help make this a reality?

# CIO Panel Question 6 - Ian MacLeod

- At Douglas College, how is growth being managed and balanced with cloud strategies while developing interfaces with key software platforms?

# CIO Panel Question 7 - Bradley Bowness

- What transformational dialogs and changes are happening at CNC regarding transitioning to the cloud and how is the college community being engaged?

# CIO Panel Question 8 - All

- A) What does the future look like for your institution to take advantage of future SaaS, IaaS and PaaS services from strategic partners
- B) What benefits do you see regarding usability and user experience?

# Thank You...
