Artificial Intelligence: AI is a broad category

*Source: Educause

AI in Medicine & Health

Genomics

Proteomics

Health Records

TBD...

- Platforms
- Privacy
- Ethics
- Tools
- Skills

- Student Success – Early Alert
- Registrars Office – Admissions, Recruitment
- Digital experience – chatbots, q&a’s

Game-Changing Technologies

Percentage of Respondents

	Higher Education (n = 172)		Top Performers (n = 230)		Typical Performers (n = 2,329)		Trailing Performers (n = 276)	
1	Artificial intelligence/machine learning	24%	Artificial intelligence/machine learning	40%	Artificial intelligence/machine learning	25%	Artificial intelligence/machine learning	24%
2	Industry specific	24%	Data analytics (including predictive analytics)	23%	Data analytics (including predictive analytics)	25%	Data analytics (including predictive analytics)	21%
3	Data analytics (including predictive analytics)	17%	Cloud (including XaaS)	12%	Cloud (including XaaS)	10%	Cloud (including XaaS)	14%
4	Cloud (including XaaS)	8%	Digital transformation	10%	Internet of Things	10%	Internet of Things	11%
5	Digital transformation	8%	Mobile (including 5G)	7%	Digital transformation	9%	Digital transformation	7%
6	ERP	7%	RPA	6%	Mobile (including 5G)	6%	Industry-specific	5%
7	CRM	5%	Internet of Things	6%	Automation	5%	Business intelligence	5%
8	Immersive experience	5%	Blockchain	5%	Blockchain	4%	Automation	5%
9	Internet of Things	4%	Automation	3%	Industry-specific	4%	Blockchain	5%
10	Business intelligence	3%	Information technology	3%	Business intelligence	3%	Mobile (including 5G)	5%

Base: All answering, excluding prefer not to answer, n varies by segment
 Showing the 10 most common answers per segment, coded open-text responses, multiple responses allowed.
 Q: Which technology area do you expect will be a "game changer" for your organization?

Framework for Implementation of AI

Business Capabilities/Opportunities

- Bottlenecks, scaling challenges, capacity building
- Collaborative intelligence
- Prediction, decision enhancement
- Personalization
- Enhanced customer service
- Fraud detection
- Image and speech recognition

Technologies

- Robotics and cognitive automation
- Cognitive insight
- Cognitive engagement

“Cognitive systems perform tasks, not jobs” [1]

Implementation Considerations

- Scaling up
- Integrations
- Immature technologies
- Low hanging fruit vs. moon shot
- Division of labour between human and AI
- New job categories
- Lifecycle management of algorithms

Role of the CIO

- Choose the right technologies
- Align to digital and business strategy
- Develop a portfolio of projects
- Assess impacts – Cognitive Work Redesign
- New policies
- New/changed risks
- Change leadership
